

DISC INDEX

# Danica Joy Austria

April 14, 2026

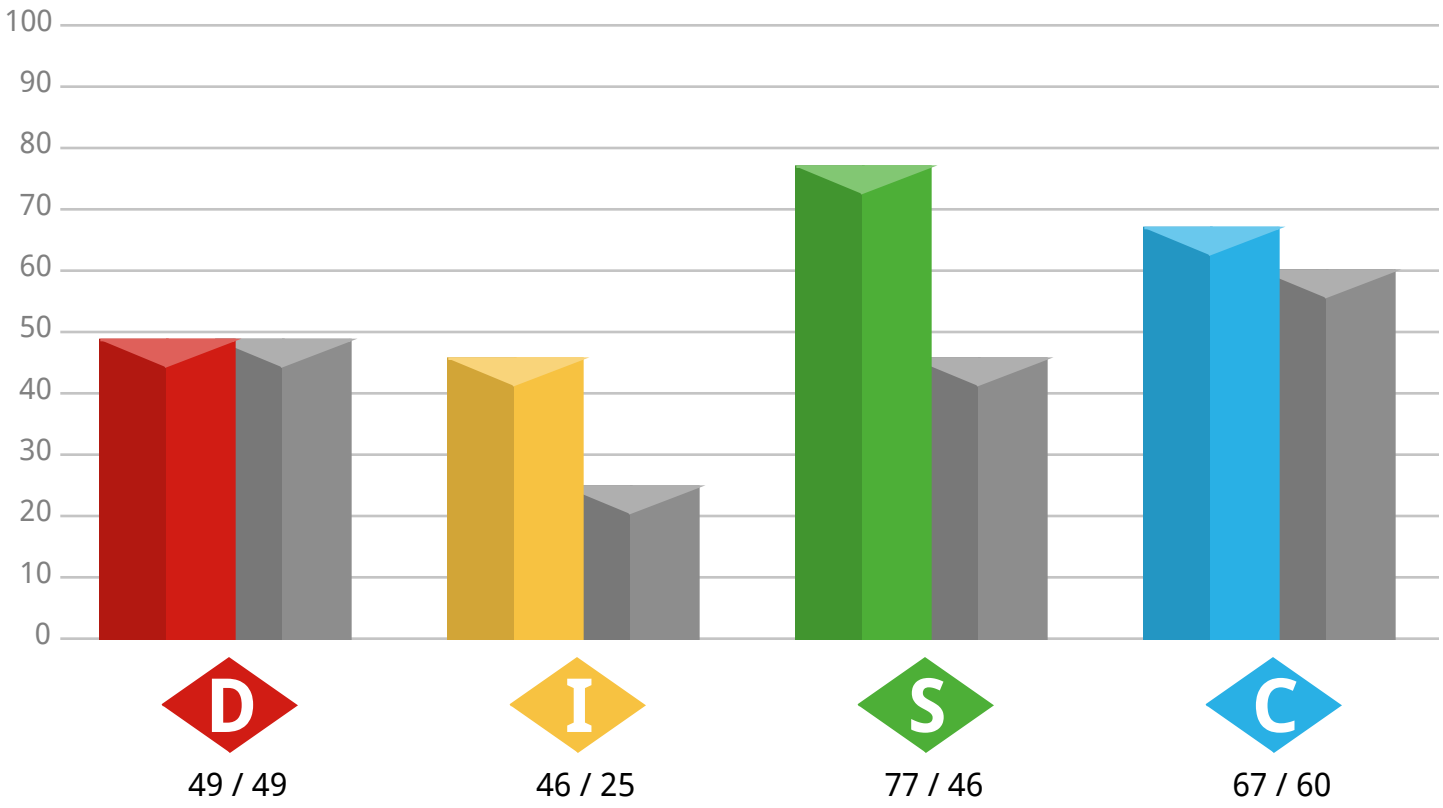

This Innermetrix Disc Index was authored by Jay Niblick, the Founder and CEO of Innermetrix. It is a modern interpretation of Dr. William Marston's behavioral dimensions. Marston's research uncovered four quadrants of behavior which help to understand a person's behavioral preferences.  This Disc Index will help you understand your behavioral style and how to maximize your potential.

# Natural and Adaptive Styles Comparison

**Natural Style:** The natural style is how you behave when you are being most natural. It is your basic style and the one you adopt when you are being authentic and true to yourself. It is also the style that you revert to when under stress or pressure. Behaving in this style, however, reduces your stress and tension and is comforting. When authentic to this style you will maximize your true potential more effectively.

**Adaptive Style:**
The adaptive style is how you behave when you feel you are being observed or how you behave when you are aware of your behavior. This style is less natural and less authentic for you or your true tendencies and preferences. When forced to adapt to this style for too long you may become stressed and less effective.

## About This Report

Research conducted by Innermetrix shows that the most successful people share the common trait of self-awareness. They recognize the situations that will make them successful, and this makes it easy for them to find ways of achieving objectives that fit their behavioral style. They also understand their limitations and where they are not effective and this helps them understand where not to go or how not to be as well. Those who understand their natural behavioral preferences are far more likely to pursue the right opportunities, in the right way, at the right time, and get the results they desire.

This report measures four dimensions of your behavioral style. They are:

- **D**ecisive — your preference for problem solving and getting results
- **I**nteractive — your preference for interacting with others and showing emotion
- **S**tability — your preference for pacing, persistence and steadiness
- **C**autious — your preference for procedures, standards and protocols

**This report includes:**

- **The Elements of DISC** — Educational background behind the profile, the science and the four dimensions of behavior
- **The DISC Dimensions** — A closer look at each of your four behavioral dimensions
- **Style Summary** — A comparison of your natural and adaptive behavioral styles
- **Behavioral Strengths** — A detailed strengths-based description of your overall behavioral style
- **Communication** — Tips on how you like to communicate and be communicated with
- **Ideal Job Climate** — Your ideal work environment
- **Effectiveness** — Insights into how you can be more effective by understanding your behavior
- **Behavioral Motivations** — Ways to ensure your environment is motivational
- **Continual Improvement** — Areas where you can focus on improving
- **Training & Learning Style** — Your preferred means of sharing and receiving styles
- **Relevance Section** — Making the information real and pertinent to you
- **Success Connection** — Connecting your style to your own life

## The Elements of the DISC-Index

This DISC-Index report is unique in the marketplace for a number of reasons. You just completed the first ever click & drag DISC instrument on the market. This was constructed in a precise manner to allow for ease of responses, even in the midst of many difficult decisions. This intuitive interface allows you to focus on your answers, not the process.

Also, unlike other DISC instruments, this instrument allows you to rank all four items instead. As a result, this instrument produces zero waste in responses. Some instruments ask you to choose two items out of four, and leave two items blank. Those instruments have a 50% waste of terms, and do not provide for an efficient response process. The DISC Index instrument eliminates that response problem.

Another unique aspect of this DISC-Index report is that we present the DISC aspects of your behavior both as separate entities and as a dynamic combination of traits. This report presents the first time that each of the DISC elements are separated and developed as pure entities of themselves. This can serve as an important learning tool as you explore the deeper aspects of DISC. Your unique pattern of DISC traits is developed through the context of this report. Additionally, the following four pages will be devoted to exploring your DISC scores as separate components within the unique combination of traits that you exhibit.

A comment on contradictions: You may read some areas of this report that may contradict other text. This is due to the fact that many of us show contradictory behaviors in the normal course of our daily operations. Each of us are at times talkative and other times more reflective, depending on how we are adapting our behavior. The expression of these contradictions is a demonstration of the sensitivity of this instrument to determine these subtle differences in our natural and adaptive style.

## A closer look at the four components of your behavioral style

| Decisive | Interactive | Stabilizing | Cautious |
|---|---|---|---|
| **Problems:** | **People:** | **Pace:** | **Procedures:** |
| How you tend to approach problems and make decisions | How you tend to interact with others and share opinions | How you tend to pace things in your environment | Your preference for established protocol/ standards |
| **High D** | **High I** | **High S** | **High C** |
| **Demanding** | **Gregarious** | **Patient** | **Cautious** |
| Driving | Persuasive | Predictable | Perfectionist |
| Forceful | Inspiring | Passive | Systematic |
| Daring | Enthusiastic | Complacent | Careful |
| Determined | Sociable | Stable | Analytical |
| Competitive | Poised | Consistent | Orderly |
| Responsible | Charming | Steady | Neat |
| Inquisitive | Convincing | Outgoing | Balanced |
| Conservative | Reflective | Restless | Independent |
| Mild | Matter-of-fact | Active | Rebellious |
| Agreeable | Reserved | Chaotic | Careless |
| **Deliberate** | **Introspective** | **Spontaneous** | **Challenging** |
| **Low D** | **Low I** | **Low S** | **Low C** |

## Decisive

### Your approach to problem-solving and obtaining results

The D in DISC represents Decisiveness. Your score on this scale, represented below, shows your location on the D spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

**Higher D —**
Tend to solve new problems very quickly and assertively. They take an active and direct approach to obtaining results. The key here is new problems such as those that are unprecedented or haven't happened before. There may also be an element of risk in taking the wrong approach or developing an incorrect solution, but those with a High D score are willing to take those risks, even if they may be incorrect.

**Lower D —**
Tend to solve new problems in a more deliberate, controlled, and organized manner. Again, the key here is new and unprecedented problems. The Lower D style will solve routine problems very quickly because the outcomes are already known. But, when the outcomes are unknown and the problem is an uncertain one, the Lower D style will approach the new problem in a calculated and deliberate manner by thinking things through very carefully before acting.

Your score shows a low average score on the 'D' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You may be hesitant to share your opinion with others if the topic is divisive or hotly contested.
- Sometimes you demand too much of yourself.
- You like to think things through before acting.
- You are quite self-critical of yourself and demand a lot out of yourself.
- You are open to deferring to others for decisions when they have voiced a stronger opinion.
- Under high pressure, you may become somewhat indecisive or resistant to making a very quick decision.

## Interactive

### Your approach to interacting with people and display of emotions

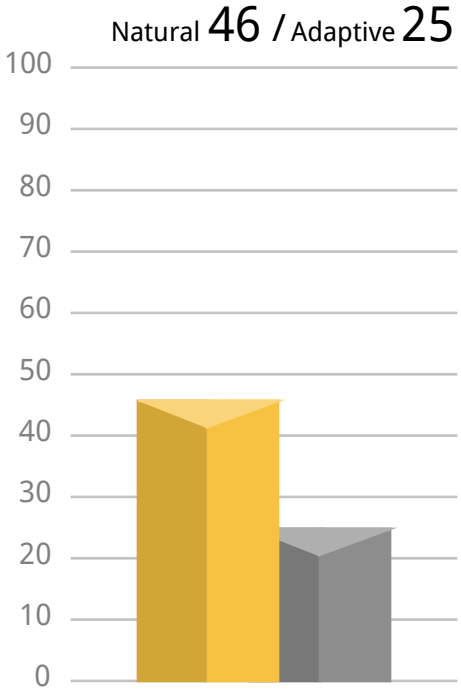

The I in DISC represents Interactive. Your score on this scale represented below shows your location on the I spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

**Higher I —**

Tend to meet new people in an outgoing, gregarious, and socially assertive manner. The key here is new people whom one hasn't met before. Many other styles are talkative, but more so with people that they've known for some time. The Higher I scores are talkative, interactive and open even with people whom they have just initially met. People scoring in this range may also be a bit impulsive. Generally speaking, those with the Higher I scores are generally talkative and outgoing.

**Lower I —**

Tend to meet new people in a more controlled, quiet and reserved manner. Here's where the key word "new people" enters the equation. Those with Lower I scores are talkative with their friends and close associates, but tend to be more reserved with people they've just recently met. They tend to place a premium on the control of emotions, and approach new relationships with a more reflective approach than an emotional one.

Your score shows a low average score on the 'I' spectrum. The comments below highlight some of the traits specific to just your unique score.

- Your amicable approach means you may be hard to really "read."
- Make sure to encourage others in a more vocal or open way.
- You can easily interact with others.
- Expressing more enthusiasm might help you connect with others more.
- For really important tasks, you may prefer to work alone without too much involvement from others.
- You sincerely like to support and work with others.

Copyright 2026 Innermetrix Incorporated • All rights reserved

## Stabilizing

### Your approach to the pace of the work environment

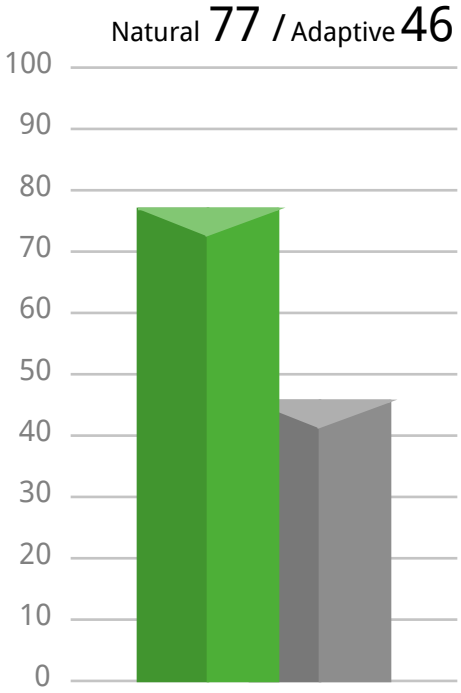

The S in DISC represents Stabilizing. Your score on this scale represented below shows your location on the S spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

**Higher S —**

Tend to prefer a more controlled, deliberative and predictable environment. They place a premium on security of a work situation and disciplined behavior. They also tend to show a sense of loyalty to a team or organization, and as a result, may have a greater longevity or tenure in a position than some other styles. They have an excellent listening style and are very patient coaches and teachers for others on the team.

**Lower S —**

Tend to prefer a more flexible, dynamic, unstructured work environment. They value freedom of expression and the ability to change quickly from one activity to another. They tend to become bored with the same routine that brings security to the Higher S traits. As a result, they will seek opportunities and outlets for their high sense of urgency and high activity levels, as they have a preference for spontaneity.

Your score shows a moderately high score on the 'S' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You are very patient.
- Increasing your sense of urgency could benefit your performance in many instances.
- You always present a more relaxed and open approach to your work and how fast you must get it done.
- You may be slow to accept changes or let go of the old ways of doing things.
- You bring a high sense of loyalty to the rules and regulations that govern projects, people, and processes.
- You are typically very cool, calm, and collected on the job.

Copyright 2026 Innermetrix Incorporated • All rights reserved

## Cautious

### Your approach to standards, procedures, and expectations

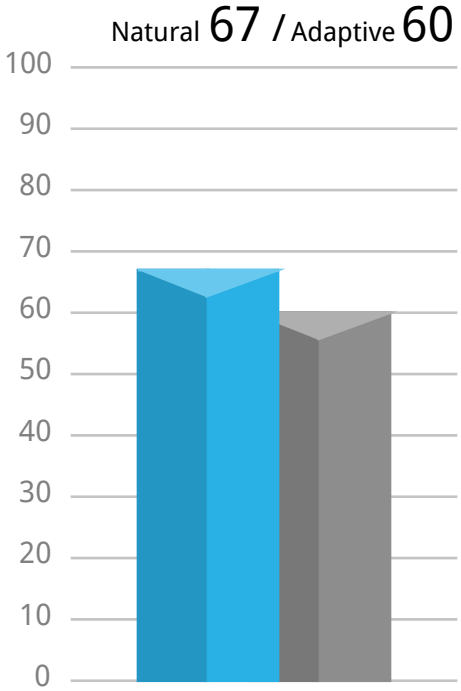

The C in DISC represents Cautiousness. Your score on the scale represented below shows your location on the C spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

**Higher C —**

Tend to adhere to rules, standards, procedures, and protocol set by those in authority whom they respect. They like things to be done the right way according to the operating manual. "Rules are made to be followed" is an appropriate motto for those with higher C scores. They have some of the highest quality control interests of any of the styles and frequently wish others would do the same.

**Lower C —**

Tend to operate more independently from the rules and standard operating procedures. They tend to be bottom-line oriented. If they find an easier way to do something, they'll do it by developing a variety of strategies as situations demand. To the Lower C scores, rules are only guidelines, and may be bent or broken as necessary to obtain results.

Your score shows a moderately high score on the 'C' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You prefer a neat and clean work environment.
- You may be perceived as somewhat resistant to change.
- You like to work in an environment that is very precise and more structured.
- You desire a great deal of explanation before beginning new tasks.
- You possess excellent critical thinking and problem solving ability.
- You believe in maintaining high standards of quality control.

Copyright 2026 Innermetrix Incorporated • All rights reserved

**Natural Style Pattern:**

Your natural style is the way you tend to behave when you aren't thinking about it. This is where you are most comfortable (natural). This is also the style you will revert back to when under stress or moving too quickly to be consciously thinking about modifying your behavior. Finally, this is the style you should seek to be true to in your daily roles. Being natural will return better results with less effort and stress. The following statements are true to just your unique natural style:

- You bring a very high level of conscientiousness and follow-through in working on detailed projects and complex assignments.
- Others on the team may seek you out to answer a detailed question for them. (The word about your high competence and knowledge-base gets around the organization quickly.)
- Scores like those who keep a careful eye on the organizational clock and maintain a keen awareness of time-lines for systems and projects.
- You have a need for specific details related to your area of authority and responsibility.
- Extremely high sense of quality control and detail orientation in all you do for the team or organization.
- May tend to get bogged down in details during some decision-making processes. The reason is that you may keep the data-gate open too long. There may be more information forthcoming that might impact the direction of the decision.
- Has a high sense of 'neatness' in the organizational workspace and at home. Everything in its place is preferred over clutter of some other style preferences.
- Decisions are made after careful consideration of all variables and inputs. This process may take a bit more time in the view of some others on the team, but the decision will be a quality outcome.

Copyright 2026 Innermetrix Incorporated • All rights reserved

**Adaptive Style Pattern:**

This is the style of behavior you adapt to when you are conscious of your own behavior, when you feel you are being observed or whenever you are trying to better fit a situation. This is not a natural style for you, but still one of your two styles none-the-less. In other words, it is the way you feel you "should" behave when thinking about it. The statements below are specific to your individual Adaptive style:

- Known to say 'yes' more than 'no' when asked to help out with a colleague's project or problem.
- Known by others to show a high degree of internal loyalty to people, projects, and ideals.
- You are seen by others as one who is down-to-earth, approachable, and technically competent in your areas of authority and responsibility.
- You may prefer to socialize with a rather small group of associates and build deeper relationships than have shallow relationships with a wide number of people.
- Respects the organizational operating protocol as it is. "If is isn't broken, don't try to fix it."
- As a leader or member of a project team, you may show a deliberate, dispassionate, and serious approach to solving problems.
- Tends to have deep family connections, and may hesitate to travel for extended periods of time away from the family.
- You tend to resist the impulses toward fad solutions, and prefers to establish your own processes instead.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on your behavioral style there are certain opportunities for becoming more effective by being aware of how you prefer, and enjoy, to behave. The items below may assist you in your professional development growth. By understanding these items you may find explanations for why you may be stuck in some areas of your life and why other aspects give you no trouble at all. You could be more effective by:

- Sufficient time for effective planning.
- Increased authority to delegate routine tasks and procedures to those you know and trust.
- Working with others who have a high level of quality-orientation.
- An environment with high quality control systems and processes.
- Work assignments of high precision and accuracy to capitalize on your high detail orientation.
- An environment with minimal sudden changes and crises.
- Greater participation in team efforts and activities.
- Complete explanations of the nature of a process, and the systems used for completion.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style will cause you to be motivated by certain factors in your environment. Having these present may make you feel more motivated, and productive. The following are things that you may want in your surroundings to feel optimally motivated:

- Sincerity from peers and colleagues.
- A moderate to greater level of security in the environment.
- A link to some of the successful traditions that have built success in the past.
- Sufficient time to adjust to change so as not to disrupt systems and processes.
- An environment with minimal interpersonal conflict and hostility.
- Identification with company and colleagues that one can be proud of.
- A home life that is supportive of the work demands.
- Appreciation for the competence and work ethic demonstrated over the long haul.

Each behavioral style contains certain unique strengths as a result of how your four behavioral dimensions relate to each other. Understanding your own unique behavioral strengths is an important part of putting your new level of self-awareness to work for your success and satisfaction. The following statements highlight specific strengths of your behavioral style:

- You score like those who take their responsibilities seriously, and exercise their authority in a sincere and conscientious manner.
- Excellent, considerate, and analytic listening style.
- Tactful in explaining ideas that may impact others on the team.
- Provides a heavy mind-share on projects and ideas. Considers possible areas of trouble that others on the team may have overlooked.
- May be sought after by other members of the team because of your high knowledge-base of processes and procedures.
- Provides an objective reality-focused view of systems, procedures, and organizational operations.
- High degree of accuracy while keeping an ear to the project-clock and time-line.
- Patient in working with others on the team, and demonstrating appropriate methods for completing a project with attention to details.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style plays a significant role in determining what aspects of an environment you like. The items below will help you understand what will define an ideal working climate for you. Based on how you prefer to behave, an ideal climate for you is one that provides you with:

- Operational procedures and policies that are clear, well-defined, and in writing.
- A culture in which you can interact with people on a casual and personal basis.
- An appreciation of the very high degree of patience you bring to the job culture and sincerity in working with others.
- Clear-cut lines of decision-making authority.
- An organizational culture that allows time to consider changes, rather than jumping into change.
- Working with a smaller group of competent people with whom trust has been established.
- Project success is a result of patience and deliberate procedures, not haste or impulsive reactions.
- Work projects involving accuracy, consistent performance, and specialized skills.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Along with strengths, all behavioral styles come with areas that could become weaknesses - if depended upon or not acknowledged. The trick is not to manufacture a weakness in the first place by depending on these things.

Here are a few items that could become problematic for you if not acknowledged or known. Your awareness of the potentials below is your best step in making sure they remain only potential problems. Due to your behavioral style, you may tend to:

- May sometimes use facts, figures, and details as a 'security blanket' to avoid objections, confrontation, or hostility.
- Could warm up a bit more when meeting new people or talking with those not intimately involved in your immediate work.
- May be perceived by others as very private, guarded, shy, and undemonstrative.
- Could use involvement and interaction with a wider variety of people, not just those like yourself.
- May sometimes be overly dependent on a very few people who share a similar quality control focus, to the exclusion of others on the team who may also provide valuable input and ideas.
- Could demonstrate a bit more spontaneity, and take yourself a bit less seriously.
- May sometimes oversell on standard operating procedure, rules, or regulations.
- May be too tightly linked to established procedures and tradition, even when more efficient and effective methods become available.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on how you tend to behave you have certain preferences for how you like to convey information, teach, instruct or share knowledge with others. This is also true of how you like to receive information and learn. Understanding your behavioral preferences here will help increase your effectiveness in teaching or instructing others, and in being taught and learning.

**How you prefer to share knowledge or teach:**

- Wants to provide participants with the ability to understand principles and concepts.
- Very accurate in presenting information.
- Confident even in the midst of complex material, because you have done your homework long before the session began.
- Leads through factual persuasion.
- Precise in evaluations of participants to increase their quality of knowledge.
- Presents detailed information in a logical and sequential manner.
- Shows authority by demonstrating trust and participation with the group.

**How you prefer to receive knowledge or learn:**

- Sincere participation with others. Wants to learn and help others learn as well.
- Looks for meaning and clear integration of the learning activities.
- Needs details and time to reflect on learning.
- Prefers explicit instructions and measurement criteria.
- High expectations of performance on self.
- You will structure your own activities only with explicit goals and outcomes established.
- Shows patience with tedious, technical, and specialty tasks. Does independent practice as well as working with others.

Copyright 2026 Innermetrix Incorporated • All rights reserved

This page is unique in this report because it is the only one that doesn't speak directly to you, rather to those who interact with you. The information below will help others communicate with you more effectively by appealing to your natural behavioral style. The first items are things others SHOULD do to be better understood by you (Do's) and the second list is of things others SHOULD NOT do (Don'ts) if they want you to understand them well.

**Things to do to effectively communicate with you:**

- Prepare your case in advance; don't 'wing-it' using charm alone.
- Break the ice with a brief personal comment.
- Provide assurances about input and decisions.
- Keep on task with the business agenda.
- Provide clear, specific solutions, and support your position.
- Provide a specific, step-by-step timetable with names and responsibilities.
- Be candid, open, and patient.

**Things to avoid to effectively communicate with you:**

- Don't be vague or ambiguous.
- Don't leave the idea or plan without backup support.
- Don't force others to agree quickly with your objectives and position; provide some time to warm up to the ideas and for mutual ownership.
- Don't use unreliable evidence or testimonials.
- Don't be unrealistic with deadlines.
- Don't be disorganized or sloppy.
- Don't offer promises you can't keep.

In order to make the most out of the information in this report it is important that you connect it to your life in a tangible way. To help you make this information your own, and pull out the most relevant parts, fill in the blanks below.

**Decisiveness:**

How is your 'D' score relevant to your life?

_____

**Interacting:**

How is your 'I' score relevant to your life?

_____

**Stabilizing:**

How is your 'S' score relevant to your life?

_____

**Cautiousness:**

How is your 'C' score relevant to your life?

_____

**Overall Natural Style:**

What is one way in which your natural style relates to your life?

_____

**Overall Adaptive Style:**

What is one way in which your adaptive style relates to your life?

_____

**Strength-based insights:**

What specific strengths do you think connect to your success more than any other?

_____
