

Jerico Burdios

March 12, 2026

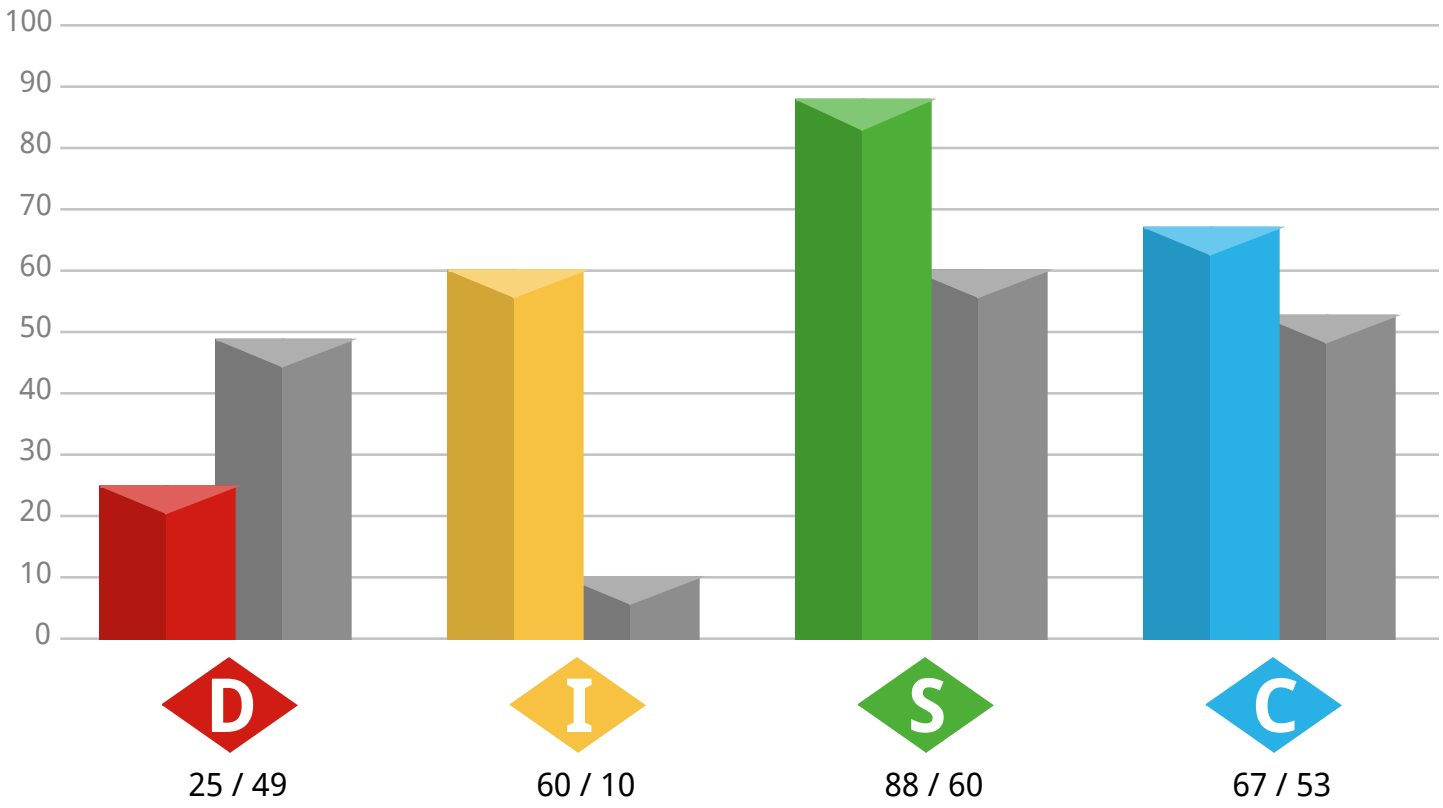

This Innermetrix Disc Index was authored by Jay Niblick, the Founder and CEO of Innermetrix. It is a modern interpretation of Dr. William Marston's behavioral dimensions. Marston's research uncovered four quadrants of behavior which help to understand a person's behavioral preferences. This Disc Index will help you understand your behavioral style and how to maximize your potential.

Natural and Adaptive Styles Comparison

Natural Style: The natural style is how you behave when you are being most natural. It is your basic style and the one you adopt when you are being authentic and true to yourself. It is also the style that you revert to when under stress or pressure. Behaving in this style, however, reduces your stress and tension and is comforting. When authentic to this style you will maximize your true potential more effectively.

Adaptive Style:
The adaptive style is how you behave when you feel you are being observed or how you behave when you are aware of your behavior. This style is less natural and less authentic for you or your true tendencies and preferences. When forced to adapt to this style for too long you may become stressed and less effective.

About This Report

Research conducted by Innermetrix shows that the most successful people share the common trait of self-awareness. They recognize the situations that will make them successful, and this makes it easy for them to find ways of achieving objectives that fit their behavioral style. They also understand their limitations and where they are not effective and this helps them understand where not to go or how not to be as well. Those who understand their natural behavioral preferences are far more likely to pursue the right opportunities, in the right way, at the right time, and get the results they desire.

This report measures four dimensions of your behavioral style. They are:

- **D**ecisive — your preference for problem solving and getting results
- **I**nteractive — your preference for interacting with others and showing emotion
- **S**tability — your preference for pacing, persistence and steadiness
- **C**autious — your preference for procedures, standards and protocols

This report includes:

- **The Elements of DISC** — Educational background behind the profile, the science and the four dimensions of behavior
- **The DISC Dimensions** — A closer look at each of your four behavioral dimensions
- **Style Summary** — A comparison of your natural and adaptive behavioral styles
- **Behavioral Strengths** — A detailed strengths-based description of your overall behavioral style
- **Communication** — Tips on how you like to communicate and be communicated with
- **Ideal Job Climate** — Your ideal work environment
- **Effectiveness** — Insights into how you can be more effective by understanding your behavior
- **Behavioral Motivations** — Ways to ensure your environment is motivational
- **Continual Improvement** — Areas where you can focus on improving
- **Training & Learning Style** — Your preferred means of sharing and receiving styles
- **Relevance Section** — Making the information real and pertinent to you
- **Success Connection** — Connecting your style to your own life

The Elements of the DISC-Index

This DISC-Index report is unique in the marketplace for a number of reasons. You just completed the first ever click & drag DISC instrument on the market. This was constructed in a precise manner to allow for ease of responses, even in the midst of many difficult decisions. This intuitive interface allows you to focus on your answers, not the process.

Also, unlike other DISC instruments, this instrument allows you to rank all four items instead. As a result, this instrument produces zero waste in responses. Some instruments ask you to choose two items out of four, and leave two items blank. Those instruments have a 50% waste of terms, and do not provide for an efficient response process. The DISC Index instrument eliminates that response problem.

Another unique aspect of this DISC-Index report is that we present the DISC aspects of your behavior both as separate entities and as a dynamic combination of traits. This report presents the first time that each of the DISC elements are separated and developed as pure entities of themselves. This can serve as an important learning tool as you explore the deeper aspects of DISC. Your unique pattern of DISC traits is developed through the context of this report. Additionally, the following four pages will be devoted to exploring your DISC scores as separate components within the unique combination of traits that you exhibit.

A comment on contradictions: You may read some areas of this report that may contradict other text. This is due to the fact that many of us show contradictory behaviors in the normal course of our daily operations. Each of us are at times talkative and other times more reflective, depending on how we are adapting our behavior. The expression of these contradictions is a demonstration of the sensitivity of this instrument to determine these subtle differences in our natural and adaptive style.

Decisive

Your approach to problem-solving and obtaining results

The D in DISC represents Decisiveness. Your score on this scale, represented below, shows your location on the D spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher D —
Tend to solve new problems very quickly and assertively. They take an active and direct approach to obtaining results. The key here is new problems such as those that are unprecedented or haven't happened before. There may also be an element of risk in taking the wrong approach or developing an incorrect solution, but those with a High D score are willing to take those risks, even if they may be incorrect.

Lower D —
Tend to solve new problems in a more deliberate, controlled, and organized manner. Again, the key here is new and unprecedented problems. The Lower D style will solve routine problems very quickly because the outcomes are already known. But, when the outcomes are unknown and the problem is an uncertain one, the Lower D style will approach the new problem in a calculated and deliberate manner by thinking things through very carefully before acting.

Your score shows a moderately low score on the 'D' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You may defer to others who exhibit a stronger opinion or are more vocal.
- You may be prone to avoiding difficult decisions, and this can create delays.
- You may be somewhat conservative in decision-making on important issues.
- You can be overly self-critical of your ability on certain issues or tasks.
- You might be hesitant to make important decisions quickly under time pressure.
- You tend to be more modest than egocentric in dealing with others.

Interactive

Your approach to interacting with people and display of emotions

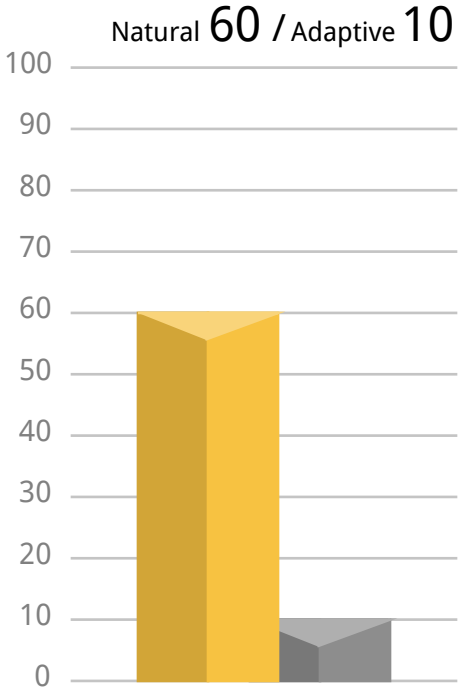

The I in DISC represents Interactive. Your score on this scale represented below shows your location on the I spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher I —

Tend to meet new people in an outgoing, gregarious, and socially assertive manner. The key here is new people whom one hasn't met before. Many other styles are talkative, but more so with people that they've known for some time. The Higher I scores are talkative, interactive and open even with people whom they have just initially met. People scoring in this range may also be a bit impulsive. Generally speaking, those with the Higher I scores are generally talkative and outgoing.

Lower I —

Tend to meet new people in a more controlled, quiet and reserved manner. Here's where the key word "new people" enters the equation. Those with Lower I scores are talkative with their friends and close associates, but tend to be more reserved with people they've just recently met. They tend to place a premium on the control of emotions, and approach new relationships with a more reflective approach than an emotional one.

Your score shows a high average score on the 'I' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You may sometimes promise a bit more than you can deliver because of your natural optimism.
- You work best when you are able to interact with others.
- You can be an effective coach or counselor for others.
- You like democratic not dictatorial relationships on the job.
- You could be a bit more organized and attentive to details.
- You tend to meet new people in a confident and appropriate manner.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Stabilizing

Your approach to the pace of the work environment

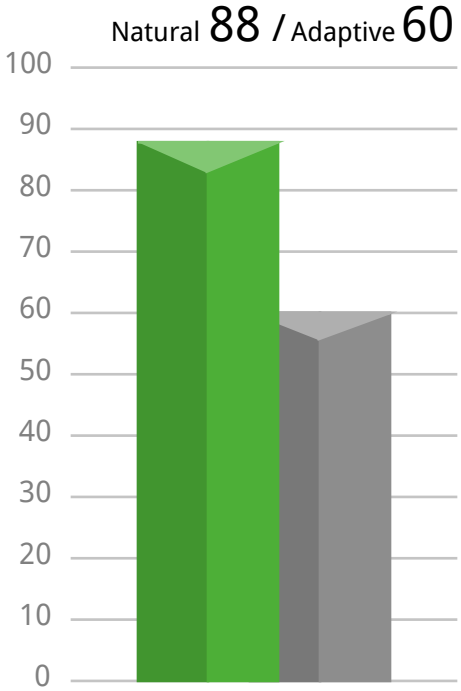

The S in DISC represents Stabilizing. Your score on this scale represented below shows your location on the S spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher S —

Tend to prefer a more controlled, deliberative and predictable environment. They place a premium on security of a work situation and disciplined behavior. They also tend to show a sense of loyalty to a team or organization, and as a result, may have a greater longevity or tenure in a position than some other styles. They have an excellent listening style and are very patient coaches and teachers for others on the team.

Lower S —

Tend to prefer a more flexible, dynamic, unstructured work environment. They value freedom of expression and the ability to change quickly from one activity to another. They tend to become bored with the same routine that brings security to the Higher S traits. As a result, they will seek opportunities and outlets for their high sense of urgency and high activity levels, as they have a preference for spontaneity.

Your score shows a very high score on the 'S' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You're not great at letting things go (e.g., original decisions, long held beliefs, etc).
- You like having a strong identification or connection with the group, organization, or mission.
- You are an excellent team player.
- You possess excellent listening skills – some of the best.
- You are always seen as cool, calm, and collected on the outside (whether that is true on the inside or not).
- You are very predictable, in a good way. You're always there, ready to pitch in, and complete the assignment.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Cautious

Your approach to standards, procedures, and expectations

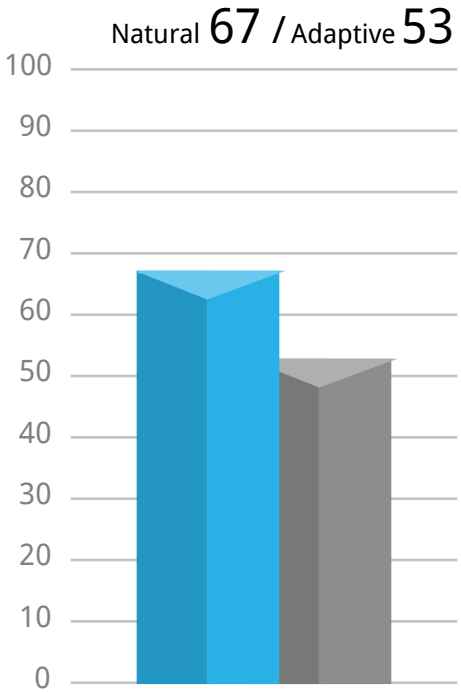

The C in DISC represents Cautiousness. Your score on the scale represented below shows your location on the C spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher C —

Tend to adhere to rules, standards, procedures, and protocol set by those in authority whom they respect. They like things to be done the right way according to the operating manual. "Rules are made to be followed" is an appropriate motto for those with higher C scores. They have some of the highest quality control interests of any of the styles and frequently wish others would do the same.

Lower C —

Tend to operate more independently from the rules and standard operating procedures. They tend to be bottom-line oriented. If they find an easier way to do something, they'll do it by developing a variety of strategies as situations demand. To the Lower C scores, rules are only guidelines, and may be bent or broken as necessary to obtain results.

Your score shows a moderately high score on the 'C' spectrum. The comments below highlight some of the traits specific to just your unique score.

- When you disagree, you may express your resistance in a passive-aggressive manner.
- You may be perceived as somewhat resistant to change.
- You believe in maintaining high standards of quality control.
- You prefer a neat and clean work environment.
- You like to use a lot of detail when explaining processes and tasks to others.
- You believe that if it's worth doing, it's worth doing correctly the first time.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Natural Style Pattern:

Your natural style is the way you tend to behave when you aren't thinking about it. This is where you are most comfortable (natural). This is also the style you will revert back to when under stress or moving too quickly to be consciously thinking about modifying your behavior. Finally, this is the style you should seek to be true to in your daily roles. Being natural will return better results with less effort and stress. The following statements are true to just your unique natural style:

- You score like those who desire to become the best they can, or an expert, in a specific area.
- You have the ability to focus on building your own skills and talents while also assisting others on the team in building their own skills.
- You have the ability to handle people with patience, and demonstrate high technical competence in your area of expertise.
- You persuade others by demonstrating personal competence and encouraging others with a sense of optimism.
- Tend to be optimistic and demonstrate high personal standards and set high goals for yourself.
- May become verbally disappointed when standards aren't met, or when the team project becomes delayed.
- Will be verbal if workload or areas of responsibility need partial delegation to other professionals on the team, otherwise, tendency may be to stay focused on the tasks at hand.
- You have a large knowledge-base and a continuing appetite to learn more.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Adaptive Style Pattern:

This is the style of behavior you adapt to when you are conscious of your own behavior, when you feel you are being observed or whenever you are trying to better fit a situation. This is not a natural style for you, but still one of your two styles none-the-less. In other words, it is the way you feel you "should" behave when thinking about it. The statements below are specific to your individual Adaptive style:

- You keep a careful eye on the organizational clock and maintain a keen awareness of time-lines for systems and projects.
- Appreciates security in projects, systems, and the job culture. Much of that security may be achieved by maintaining high standards of operational quality.
- You set high performance standards for yourself and others, and expect all to meet those standards.
- Has a high sense of 'neatness' in the organizational workspace and at home. Everything in its place is preferred over clutter of some other style preferences.
- Persuades others on the team by careful attention to detail, and through facts, data, and logic, not emotion.
- On work related projects you tend to be restrained and reticent in showing emotions, and may not be extremely verbal at a team meeting, unless asked for input or if the topic is one of high importance to you.
- You bring a very high level of conscientiousness and follow-through in working on detailed projects and complex assignments.
- Project decisions are made after careful consideration of all variables and inputs. This process may take a bit more time in the view of some others on the team, but the decision will be a quality outcome.

Based on your behavioral style there are certain opportunities for becoming more effective by being aware of how you prefer, and enjoy, to behave. The items below may assist you in your professional development growth. By understanding these items you may find explanations for why you may be stuck in some areas of your life and why other aspects give you no trouble at all. You could be more effective by:

- Learning to say "no" more often to requests from others, to prevent spreading yourself too thin.
- Having reassurances that it is OK to take appropriate and calculated risks.
- Associating with friendly, active people.
- Having the option to change certain methods or procedures in order to increase efficiency.
- Having an efficient system in place to handle routine work more effectively.
- Having sufficient time to consider alternatives prior to making changes.
- A democratic environment in which you can influence and offer direction.
- Clear and specific job descriptions, and role responsibilities.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style will cause you to be motivated by certain factors in your environment. Having these present may make you feel more motivated, and productive. The following are things that you may want in your surroundings to feel optimally motivated:

- Detailed examples and specific information about suggested changes to be made in processes that may have an impact on quality.
- Security in knowing that the products and services are of highest quality.
- Standard operating procedures that can support a quality initiative without being changed dramatically.
- A link to some of the successful traditions that have built success in the past.
- To be included as a part of the work group in social functions.
- Sincerity from peers and colleagues.
- Identification with a high quality company and colleagues that one can be proud of.
- Complete explanations of systems and processes that impact your work environment.

Jerico Burdios

Each behavioral style contains certain unique strengths as a result of how your four behavioral dimensions relate to each other. Understanding your own unique behavioral strengths is an important part of putting your new level of self-awareness to work for your success and satisfaction. The following statements highlight specific strengths of your behavioral style:

- Extensive base of both knowledge and expertise can be tapped to assist in getting a job done.
- Solves problems with people in mind.
- Ready, willing, and able to assist others on the team with a specialized project. All they have to do is ask.
- Excellent time management skills, and deadline conscious.
- Provides a high degree of mind-share on projects and processes, alert to the potential problems and controls necessary.
- Brings enthusiasm and optimism to team projects.
- A keen awareness of the broad-based impact of important decisions.
- Has the ability to get along well with a wide variety of other behavioral styles.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style plays a significant role in determining what aspects of an environment you like. The items below will help you understand what will define an ideal working climate for you. Based on how you prefer to behave, an ideal climate for you is one that provides you with:

- Environment where you can interact with people in a comfortable, non-hectic manner.
- Highly specialized assignments and technical areas of responsibility.
- Standard, accepted operating procedures that support sometimes complex processes.
- Freedom from intense pressured decisions.
- A work group providing close relationships with a small group of associates, rather than superficial relationships with a large group of people.
- Appreciation for the long hours and work ethic on tough projects and assignments.
- A work environment that sincerely cares for the people in it.
- Projects completed the 'right way' the first time, to avoid problems later on.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Along with strengths, all behavioral styles come with areas that could become weaknesses - if depended upon or not acknowledged. The trick is not to manufacture a weakness in the first place by depending on these things.

Here are a few items that could become problematic for you if not acknowledged or known. Your awareness of the potentials below is your best step in making sure they remain only potential problems. Due to your behavioral style, you may tend to:

- Trust people a bit too much, and may get burned in the process.
- Become overly sensitive to criticism.
- Become overly aggressive when the climate becomes unfavorable.
- Struggle with prioritizing things appropriately, due to ranking all items as the "most important".
- Hang on too much to current or past procedures, especially when faced with impending change.
- Hold a bit of a grudge.
- Require an overly complete explanation of details before changes are made.
- Oversell your own ideas too strongly.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on how you tend to behave you have certain preferences for how you like to convey information, teach, instruct or share knowledge with others. This is also true of how you like to receive information and learn. Understanding your behavioral preferences here will help increase your effectiveness in teaching or instructing others, and in being taught and learning.

How you prefer to share knowledge or teach:

- Enriches the content with stories and experiences.
- Structures events to inspire participants to act on their own ideas and visions.
- Evaluations are made based on maximizing the individual's growth more than comparatively.
- Wants to provide participants with the ability to understand principles and concepts.
- Wants to know performance outcomes, objectives, etc., and communicates these to the participants.
- Leads through factual and emotional persuasion.
- Appreciates intellectual recognition.

How you prefer to receive knowledge or learn:

- Shows patience with tedious, technical, and specialty tasks.
- High expectations of performance.
- Learns by considering possibilities and thinking through ideas.
- Shows commitment, and wants to be personally involved in learning.
- Responds actively to others, and tends to take calculated learning risks.
- Looks for meaning and clear integration of the learning activities.
- Collects data and analyzes information.

Copyright 2026 Innermetrix Incorporated • All rights reserved

This page is unique in this report because it is the only one that doesn't speak directly to you, rather to those who interact with you. The information below will help others communicate with you more effectively by appealing to your natural behavioral style. The first items are things others SHOULD do to be better understood by you (Do's) and the second list is of things others SHOULD NOT do (Don'ts) if they want you to understand them well.

Things to do to effectively communicate with you:

- Present your ideas and opinions in a non-threatening way.
- Allow time to verify the issues and potential outcomes.
- Make an organized appeal for support and contributions.
- Provide logical and practical evidence.
- Do your homework, because others will have already done their share of it.
- Be certain to remember to provide specific action steps and details for all involved.
- Outline individual tasks and responsibilities in writing.

Things to avoid to effectively communicate with you:

- If you disagree, don't let it reflect on others personally, and don't let it affect the relationship.
- Don't fail to follow through. If you say you're going to do something, do it.
- Don't whine about all of the work you have to do.
- Don't be rude, abrupt, or too fast-paced in your delivery.
- Avoid being overly task-oriented.
- Don't manipulate or bully others into agreeing.
- Don't use quick manipulations of ideas.

In order to make the most out of the information in this report it is important that you connect it to your life in a tangible way. To help you make this information your own, and pull out the most relevant parts, fill in the blanks below.

Decisiveness:
How is your 'D' score relevant to your life?

_____

Interacting:
How is your 'I' score relevant to your life?

_____

Stabilizing:
How is your 'S' score relevant to your life?

_____

Cautiousness:
How is your 'C' score relevant to your life?

_____

Overall Natural Style:
What is one way in which your natural style relates to your life?

_____

Overall Adaptive Style:
What is one way in which your adaptive style relates to your life?

_____

Strength-based insights:
What specific strengths do you think connect to your success more than any other?

_____
