

DISC INDEX

Jervyn Guianan

March 26, 2026

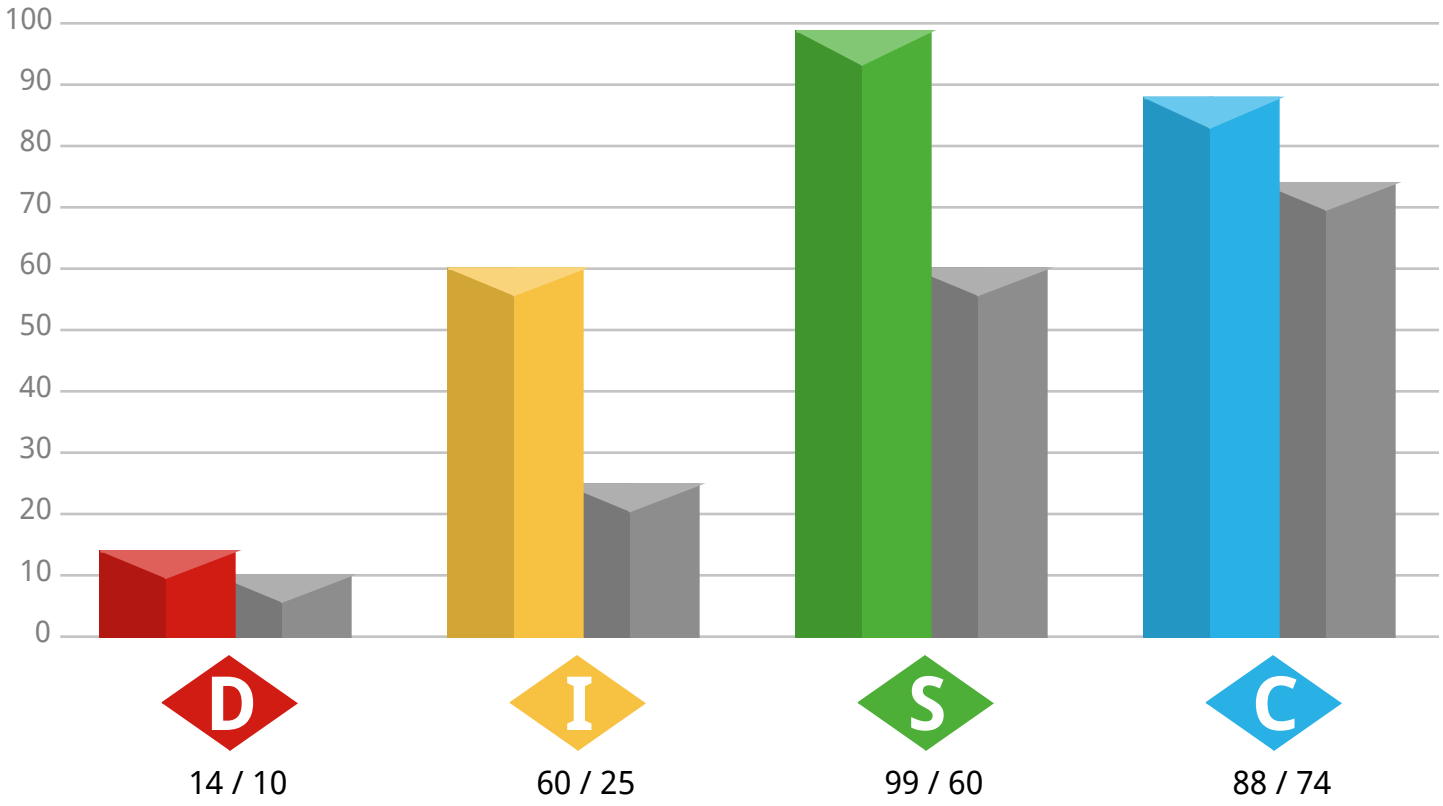

This Innermetrix Disc Index was authored by Jay Niblick, the Founder and CEO of Innermetrix. It is a modern interpretation of Dr. William Marston's behavioral dimensions. Marston's research uncovered four quadrants of behavior which help to understand a person's behavioral preferences. This Disc Index will help you understand your behavioral style and how to maximize your potential.

Natural and Adaptive Styles Comparison

14 / 10 | 60 / 25 | 99 / 60 | 88 / 74

Natural Style: The natural style is how you behave when you are being most natural. It is your basic style and the one you adopt when you are being authentic and true to yourself. It is also the style that you revert to when under stress or pressure. Behaving in this style, however, reduces your stress and tension and is comforting. When authentic to this style you will maximize your true potential more effectively.

Adaptive Style:
The adaptive style is how you behave when you feel you are being observed or how you behave when you are aware of your behavior. This style is less natural and less authentic for you or your true tendencies and preferences. When forced to adapt to this style for too long you may become stressed and less effective.

About This Report

Research conducted by Innermetrix shows that the most successful people share the common trait of self-awareness. They recognize the situations that will make them successful, and this makes it easy for them to find ways of achieving objectives that fit their behavioral style. They also understand their limitations and where they are not effective and this helps them understand where not to go or how not to be as well. Those who understand their natural behavioral preferences are far more likely to pursue the right opportunities, in the right way, at the right time, and get the results they desire.

This report measures four dimensions of your behavioral style. They are:

- **D**ecisive — your preference for problem solving and getting results
- **I**nteractive — your preference for interacting with others and showing emotion
- **S**tability — your preference for pacing, persistence and steadiness
- **C**autious — your preference for procedures, standards and protocols

This report includes:

- **The Elements of DISC** — Educational background behind the profile, the science and the four dimensions of behavior
- **The DISC Dimensions** — A closer look at each of your four behavioral dimensions
- **Style Summary** — A comparison of your natural and adaptive behavioral styles
- **Behavioral Strengths** — A detailed strengths-based description of your overall behavioral style
- **Communication** — Tips on how you like to communicate and be communicated with
- **Ideal Job Climate** — Your ideal work environment
- **Effectiveness** — Insights into how you can be more effective by understanding your behavior
- **Behavioral Motivations** — Ways to ensure your environment is motivational
- **Continual Improvement** — Areas where you can focus on improving
- **Training & Learning Style** — Your preferred means of sharing and receiving styles
- **Relevance Section** — Making the information real and pertinent to you
- **Success Connection** — Connecting your style to your own life

The Elements of the DISC-Index

This DISC-Index report is unique in the marketplace for a number of reasons. You just completed the first ever click & drag DISC instrument on the market. This was constructed in a precise manner to allow for ease of responses, even in the midst of many difficult decisions. This intuitive interface allows you to focus on your answers, not the process.

Also, unlike other DISC instruments, this instrument allows you to rank all four items instead. As a result, this instrument produces zero waste in responses. Some instruments ask you to choose two items out of four, and leave two items blank. Those instruments have a 50% waste of terms, and do not provide for an efficient response process. The DISC Index instrument eliminates that response problem.

Another unique aspect of this DISC-Index report is that we present the DISC aspects of your behavior both as separate entities and as a dynamic combination of traits. This report presents the first time that each of the DISC elements are separated and developed as pure entities of themselves. This can serve as an important learning tool as you explore the deeper aspects of DISC. Your unique pattern of DISC traits is developed through the context of this report. Additionally, the following four pages will be devoted to exploring your DISC scores as separate components within the unique combination of traits that you exhibit.

A comment on contradictions: You may read some areas of this report that may contradict other text. This is due to the fact that many of us show contradictory behaviors in the normal course of our daily operations. Each of us are at times talkative and other times more reflective, depending on how we are adapting our behavior. The expression of these contradictions is a demonstration of the sensitivity of this instrument to determine these subtle differences in our natural and adaptive style.

Decisive

Your approach to problem-solving and obtaining results

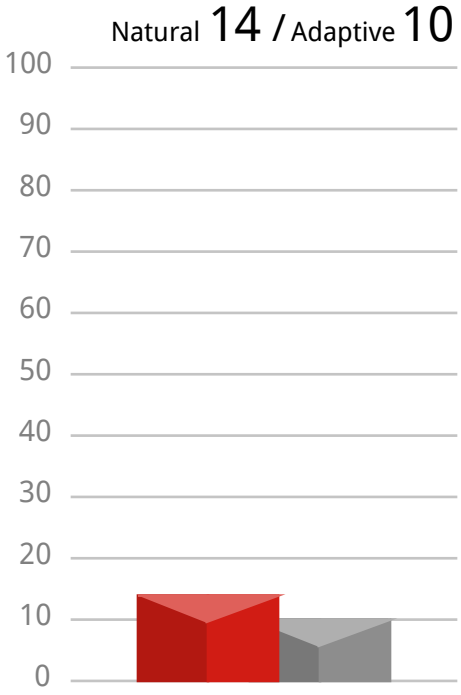

The D in DISC represents Decisiveness. Your score on this scale, represented below, shows your location on the D spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher D —

Tend to solve new problems very quickly and assertively. They take an active and direct approach to obtaining results. The key here is new problems such as those that are unprecedented or haven't happened before. There may also be an element of risk in taking the wrong approach or developing an incorrect solution, but those with a High D score are willing to take those risks, even if they may be incorrect.

Lower D —

Tend to solve new problems in a more deliberate, controlled, and organized manner. Again, the key here is new and unprecedented problems. The Lower D style will solve routine problems very quickly because the outcomes are already known. But, when the outcomes are unknown and the problem is an uncertain one, the Lower D style will approach the new problem in a calculated and deliberate manner by thinking things through very carefully before acting.

Your score shows a very low score on the 'D' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You like taking a slower, more methodical approach to making decisions.
- When it comes to solving problems you prefer to analyze the problem and evaluate potential solutions before jumping to conclusions.
- You prefer to withhold your decision until you have enough information.
- You avoid confrontations, preferring instead to work with others to resolve issues.
- You can be considered "quiet" in team settings or when in the midst of heated debates.
- You like to take a more mild-mannered and measured hand in dealing with others.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Interactive

Your approach to interacting with people and display of emotions

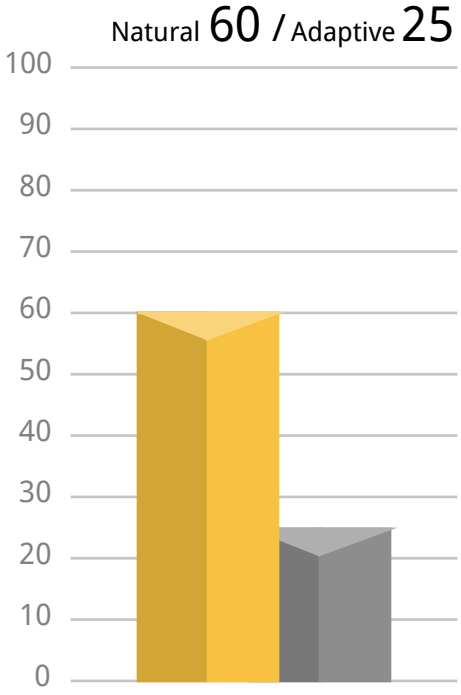

The I in DISC represents Interactive. Your score on this scale represented below shows your location on the I spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher I —

Tend to meet new people in an outgoing, gregarious, and socially assertive manner. The key here is new people whom one hasn't met before. Many other styles are talkative, but more so with people that they've known for some time. The Higher I scores are talkative, interactive and open even with people whom they have just initially met. People scoring in this range may also be a bit impulsive. Generally speaking, those with the Higher I scores are generally talkative and outgoing.

Lower I —

Tend to meet new people in a more controlled, quiet and reserved manner. Here's where the key word "new people" enters the equation. Those with Lower I scores are talkative with their friends and close associates, but tend to be more reserved with people they've just recently met. They tend to place a premium on the control of emotions, and approach new relationships with a more reflective approach than an emotional one.

Your score shows a high average score on the 'I' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You appreciate an open-door policy with both peers and supervisors.
- You can be an effective coach or counselor for others.
- You tend to be generous with your time in helping others.
- You like democratic not dictatorial relationships on the job.
- People may find you charming to meet and to converse with on a variety of topics.
- You present yourself in a poised manner to both small or large groups of people.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Stabilizing

Your approach to the pace of the work environment

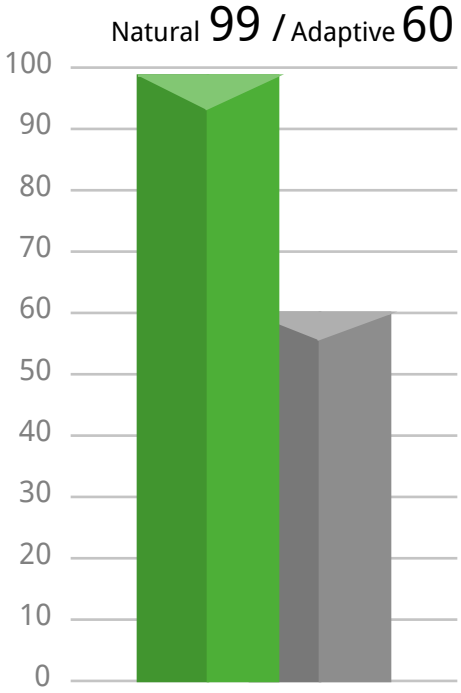

The S in DISC represents Stabilizing. Your score on this scale represented below shows your location on the S spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher S —

Tend to prefer a more controlled, deliberative and predictable environment. They place a premium on security of a work situation and disciplined behavior. They also tend to show a sense of loyalty to a team or organization, and as a result, may have a greater longevity or tenure in a position than some other styles. They have an excellent listening style and are very patient coaches and teachers for others on the team.

Lower S —

Tend to prefer a more flexible, dynamic, unstructured work environment. They value freedom of expression and the ability to change quickly from one activity to another. They tend to become bored with the same routine that brings security to the Higher S traits. As a result, they will seek opportunities and outlets for their high sense of urgency and high activity levels, as they have a preference for spontaneity.

Your score shows a very high score on the 'S' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You desire a high level of structure and order.
- You are very predictable, in a good way. You're always there, ready to pitch in, and complete the assignment.
- You can be quite resistant to change.
- You dislike any personal conflicts or hostility of any kind.
- You're not great at letting things go (e.g., original decisions, long held beliefs, etc).
- You're always willing to help out in a pressure situation, even if you don't really want to.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Cautious

Your approach to standards, procedures, and expectations

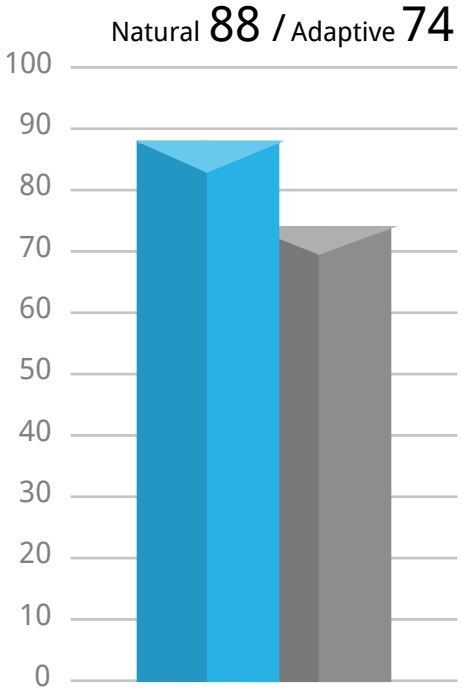

The C in DISC represents Cautiousness. Your score on the scale represented below shows your location on the C spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher C —

Tend to adhere to rules, standards, procedures, and protocol set by those in authority whom they respect. They like things to be done the right way according to the operating manual. "Rules are made to be followed" is an appropriate motto for those with higher C scores. They have some of the highest quality control interests of any of the styles and frequently wish others would do the same.

Lower C —

Tend to operate more independently from the rules and standard operating procedures. They tend to be bottom-line oriented. If they find an easier way to do something, they'll do it by developing a variety of strategies as situations demand. To the Lower C scores, rules are only guidelines, and may be bent or broken as necessary to obtain results.

Your score shows a very high score on the 'C' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You are very systematic and like to analyze details to accomplish a process correctly.
- You possess excellent critical thinking and problem-solving ability.
- When you present your argument you do so logically not emotionally.
- You can be seen as something of a perfectionist by others, especially in what you expect of yourself.
- You prefer a more conventional approach when possible (e.g., "If it isn't broken, don't fix it").
- You are a bottom-line oriented person who dislikes fluff and just wants the facts and data.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Natural Style Pattern:

Your natural style is the way you tend to behave when you aren't thinking about it. This is where you are most comfortable (natural). This is also the style you will revert back to when under stress or moving too quickly to be consciously thinking about modifying your behavior. Finally, this is the style you should seek to be true to in your daily roles. Being natural will return better results with less effort and stress. The following statements are true to just your unique natural style:

- You have a large knowledge-base and a continuing appetite to learn more.
- You persuade others by demonstrating personal competence and encouraging others with a sense of optimism.
- You place high expectations on yourself and others, and are able to help coach others into a stronger quality orientation.
- You tend to be verbal and articulate about many different topics and issues.
- Able to express a sense of humor, but you become very serious about work tasks and projects, especially in the desire to maintain a high quality control.
- Will be verbal if workload or areas of responsibility need partial delegation to other professionals on the team, otherwise, tendency may be to stay focused on the tasks at hand.
- You have the ability to self-manage much of your own organizational activity and workload.
- You score like those who desire to become the best they can, or an expert, in a specific area.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Adaptive Style Pattern:

This is the style of behavior you adapt to when you are conscious of your own behavior, when you feel you are being observed or whenever you are trying to better fit a situation. This is not a natural style for you, but still one of your two styles none-the-less. In other words, it is the way you feel you "should" behave when thinking about it. The statements below are specific to your individual Adaptive style:

- Project decisions are made after careful consideration of all variables and inputs. This process may take a bit more time in the view of some others on the team, but the decision will be a quality outcome.
- Has a high sense of 'neatness' in the organizational workspace and at home. Everything in its place is preferred over clutter of some other style preferences.
- You appreciate an occasional word of reassurance from their supervisor or board, as long as it is sincere input.
- You tend to judge others by objective standards, and want to be evaluated yourself by specific criteria as well.
- When taking risks, you score like those who take calculated, educated risks only after a thoughtful analysis of the facts and data, and have analyzed options and potential outcomes.
- You bring a very high level of conscientiousness and follow-through in working on detailed projects and complex assignments.
- Extremely high sense of quality control and detail orientation in all you do for the team or organization.
- You keep a careful eye on the organizational clock and maintain a keen awareness of time-lines for systems and projects.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on your behavioral style there are certain opportunities for becoming more effective by being aware of how you prefer, and enjoy, to behave. The items below may assist you in your professional development growth. By understanding these items you may find explanations for why you may be stuck in some areas of your life and why other aspects give you no trouble at all. You could be more effective by:

- Increased authority to delegate routine tasks and procedures.
- A democratic environment in which you can influence and offer direction.
- Having an efficient system in place to handle routine work more effectively.
- Sufficient time for effective planning.
- Associating with friendly, active people.
- An increased sense of urgency to get things done... now.
- Job description presented clearly and with no ambiguities.
- Work assignments of high precision and accuracy to capitalize on your high detail orientation.

Jervyn Guianan

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style will cause you to be motivated by certain factors in your environment. Having these present may make you feel more motivated, and productive. The following are things that you may want in your surroundings to feel optimally motivated:

- A home life that is supportive of the work demands.
- Work tasks of a highly specialized nature to support your natural curiosity and detail orientation.
- An environment with minimal interpersonal conflict and hostility.
- Identification with a high quality company and colleagues that one can be proud of.
- Sufficient time to adjust to change so as not to disrupt systems and processes.
- To be included as a part of the work group in social functions.
- Standard operating procedures that can support a quality initiative without being changed dramatically.
- A link to some of the successful traditions that have built success in the past.

Jervyn Guianan

Copyright 2026 Innermetrix Incorporated • All rights reserved

Each behavioral style contains certain unique strengths as a result of how your four behavioral dimensions relate to each other. Understanding your own unique behavioral strengths is an important part of putting your new level of self-awareness to work for your success and satisfaction. The following statements highlight specific strengths of your behavioral style:

- Maintains a stable and predictable pace to complete a complex or specialized project, and demonstrates a tireless work ethic to get the project finished.
- Excellent at motivating others toward the team goals.
- Brings appropriate people skills, patience in working with others, quality control, and attention to the details in a versatile blend of talents and expertise.
- Builds good team relationships without being an extremist.
- Shows remarkable consistency in project ability. Leading by demonstrating and mentoring. No inconsistencies, no sudden changes.
- A keen awareness of the broad-based impact of important decisions.
- Can be depended upon to do what you say you will do.
- An ability to effectively negotiate cooperation from others rather than to confront or demand it, using a combination of people skills, patience, and objective reasoning.

Jervyn Guianan

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style plays a significant role in determining what aspects of an environment you like. The items below will help you understand what will define an ideal working climate for you. Based on how you prefer to behave, an ideal climate for you is one that provides you with:

- A work environment with a predictable pattern of activity so as to monitor quality processes.
- Security in the work setting to maintain high quality control standards.
- Complete explanations of areas of responsibility and control.
- An environment relatively free from interpersonal conflict and hostility.
- Few sudden shocks or unexpected problems.
- A work group providing close relationships with a small group of associates, rather than superficial relationships with a large group of people.
- Time to reflect and think about pros and cons to solutions.
- Clear areas of responsibility with minimal ambiguities.

Jervyn Guianan

Copyright 2026 Innermetrix Incorporated • All rights reserved

Along with strengths, all behavioral styles come with areas that could become weaknesses - if depended upon or not acknowledged. The trick is not to manufacture a weakness in the first place by depending on these things.

Here are a few items that could become problematic for you if not acknowledged or known. Your awareness of the potentials below is your best step in making sure they remain only potential problems. Due to your behavioral style, you may tend to:

- Resist changes and have a lower sense of urgency.
- Overestimate the ability of others.
- Take criticism personally, even though it was directed at a work process.
- Require an overly complete explanation of details before changes are made.
- Hold too much to past tradition in procedures and processes.
- Hang on too much to current or past procedures, especially when faced with impending change.
- Become overly aggressive when the climate becomes unfavorable.
- Struggle with prioritizing things appropriately, due to ranking all items as the "most important".

Jervyn Guianan

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on how you tend to behave you have certain preferences for how you like to convey information, teach, instruct or share knowledge with others. This is also true of how you like to receive information and learn. Understanding your behavioral preferences here will help increase your effectiveness in teaching or instructing others, and in being taught and learning.

How you prefer to share knowledge or teach:

- Very accurate in presenting information.
- Prefers explicit instructions and measurement criteria to be established with the participants.
- Brings imagination and ideas to the training event.
- Appreciates intellectual recognition.
- Confident even in the midst of complex material, because you have done your homework long before the session began.
- Wants to know performance outcomes, objectives, etc., and communicates these to the participants.
- Evaluations are made based on maximizing the individual's growth more than comparatively.

How you prefer to receive knowledge or learn:

- More accepting of a more impersonal training or learning venue than others.
- Likes controlled variety in the learning environment.
- Does well with independent practice as well as working with others.
- Needs "what to do and when to do it" for optimal time and process management.
- Needs details and time to reflect on learning.
- Integrates experiences with practical applications and ideas.
- Likes self-discovery and trial and error methods occasionally.

Jervyn Guianan

This page is unique in this report because it is the only one that doesn't speak directly to you, rather to those who interact with you. The information below will help others communicate with you more effectively by appealing to your natural behavioral style. The first items are things others SHOULD do to be better understood by you (Do's) and the second list is of things others SHOULD NOT do (Don'ts) if they want you to understand them well.

Things to do to effectively communicate with you:

- Be certain to emphasize next action-steps.
- Be candid, open, and patient.
- Use the conversation to direct you back to the topic or issue at hand.
- If you say you're going to do something, do it.
- If you disagree with the direction, make an organized presentation of your position.
- Make an organized appeal for support and contributions.
- Ask for input regarding people and specific assignments.

Things to avoid to effectively communicate with you:

- Don't rush the issues or the decision-making process.
- Avoid being impersonal or judgmental.
- Don't rush into business or the agenda; provide some time to break the ice.
- Don't offer promises you can't keep.
- Don't use unreliable evidence or testimonials.
- Don't leave the idea or plan without backup support.
- Don't leave decisions hanging in the air. Be certain all decision-points have reached closure and action-plans are the result.

In order to make the most out of the information in this report it is important that you connect it to your life in a tangible way. To help you make this information your own, and pull out the most relevant parts, fill in the blanks below.

Decisiveness:

How is your 'D' score relevant to your life?

_____

Interacting:

How is your 'I' score relevant to your life?

_____

Stabilizing:

How is your 'S' score relevant to your life?

_____

Cautiousness:

How is your 'C' score relevant to your life?

_____

Overall Natural Style:

What is one way in which your natural style relates to your life?

_____

Overall Adaptive Style:

What is one way in which your adaptive style relates to your life?

_____

Strength-based insights:

What specific strengths do you think connect to your success more than any other?

_____

Jervyn Guianan
