

John Ilagan

April 5, 2026

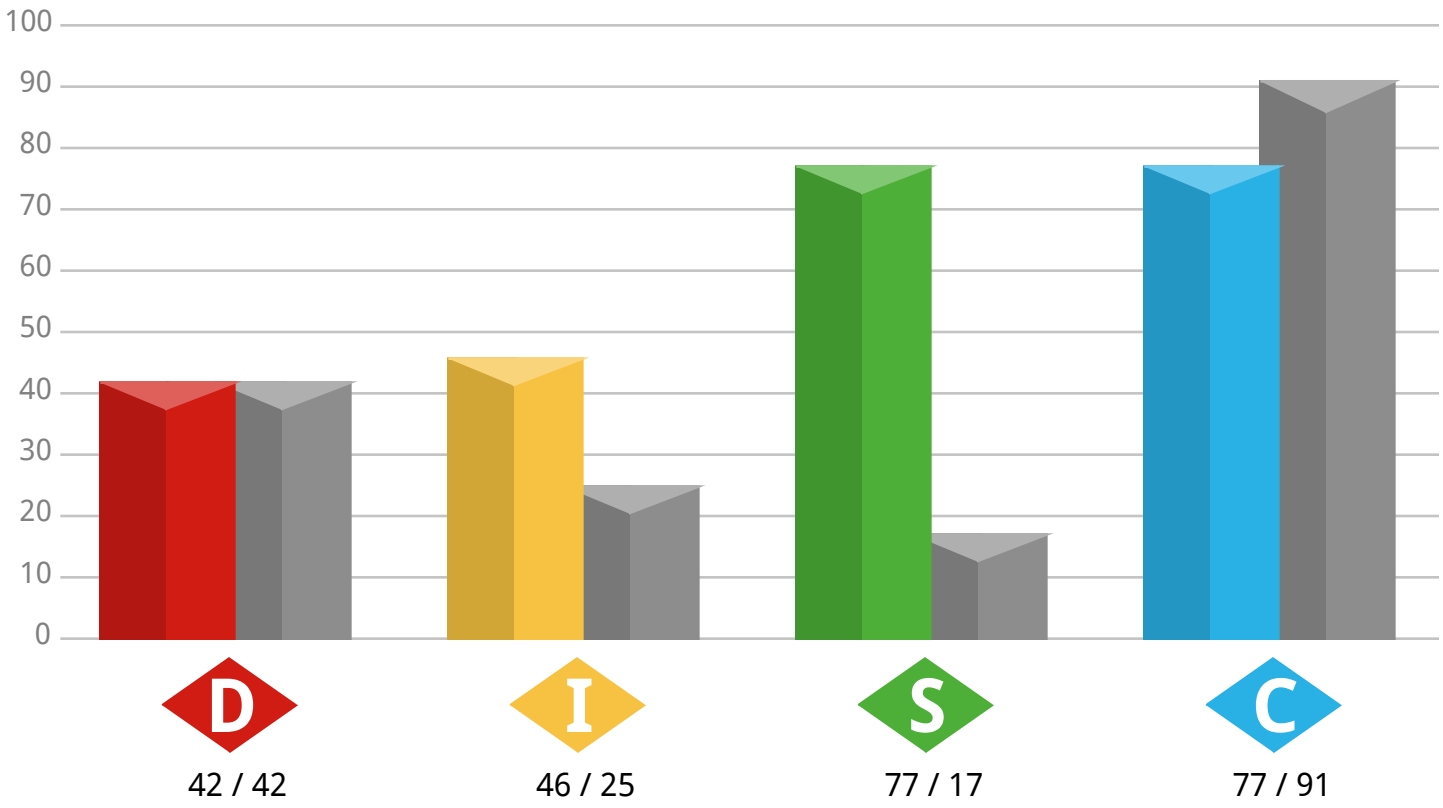

This Innermetrix Disc Index was authored by Jay Niblick, the Founder and CEO of Innermetrix. It is a modern interpretation of Dr. William Marston's behavioral dimensions. Marston's research uncovered four quadrants of behavior which help to understand a person's behavioral preferences. This Disc Index will help you understand your behavioral style and how to maximize your potential.

Natural and Adaptive Styles Comparison

Natural Style: The natural style is how you behave when you are being most natural. It is your basic style and the one you adopt when you are being authentic and true to yourself. It is also the style that you revert to when under stress or pressure. Behaving in this style, however, reduces your stress and tension and is comforting. When authentic to this style you will maximize your true potential more effectively.

Adaptive Style:
The adaptive style is how you behave when you feel you are being observed or how you behave when you are aware of your behavior. This style is less natural and less authentic for you or your true tendencies and preferences. When forced to adapt to this style for too long you may become stressed and less effective.

About This Report

Research conducted by Innermetrix shows that the most successful people share the common trait of self-awareness. They recognize the situations that will make them successful, and this makes it easy for them to find ways of achieving objectives that fit their behavioral style. They also understand their limitations and where they are not effective and this helps them understand where not to go or how not to be as well. Those who understand their natural behavioral preferences are far more likely to pursue the right opportunities, in the right way, at the right time, and get the results they desire.

This report measures four dimensions of your behavioral style. They are:

- **D**ecisive — your preference for problem solving and getting results
- **I**nteractive — your preference for interacting with others and showing emotion
- **S**tability — your preference for pacing, persistence and steadiness
- **C**autious — your preference for procedures, standards and protocols

This report includes:

- **The Elements of DISC** — Educational background behind the profile, the science and the four dimensions of behavior
- **The DISC Dimensions** — A closer look at each of your four behavioral dimensions
- **Style Summary** — A comparison of your natural and adaptive behavioral styles
- **Behavioral Strengths** — A detailed strengths-based description of your overall behavioral style
- **Communication** — Tips on how you like to communicate and be communicated with
- **Ideal Job Climate** — Your ideal work environment
- **Effectiveness** — Insights into how you can be more effective by understanding your behavior
- **Behavioral Motivations** — Ways to ensure your environment is motivational
- **Continual Improvement** — Areas where you can focus on improving
- **Training & Learning Style** — Your preferred means of sharing and receiving styles
- **Relevance Section** — Making the information real and pertinent to you
- **Success Connection** — Connecting your style to your own life

The Elements of the DISC-Index

This DISC-Index report is unique in the marketplace for a number of reasons. You just completed the first ever click & drag DISC instrument on the market. This was constructed in a precise manner to allow for ease of responses, even in the midst of many difficult decisions. This intuitive interface allows you to focus on your answers, not the process.

Also, unlike other DISC instruments, this instrument allows you to rank all four items instead. As a result, this instrument produces zero waste in responses. Some instruments ask you to choose two items out of four, and leave two items blank. Those instruments have a 50% waste of terms, and do not provide for an efficient response process. The DISC Index instrument eliminates that response problem.

Another unique aspect of this DISC-Index report is that we present the DISC aspects of your behavior both as separate entities and as a dynamic combination of traits. This report presents the first time that each of the DISC elements are separated and developed as pure entities of themselves. This can serve as an important learning tool as you explore the deeper aspects of DISC. Your unique pattern of DISC traits is developed through the context of this report. Additionally, the following four pages will be devoted to exploring your DISC scores as separate components within the unique combination of traits that you exhibit.

A comment on contradictions: You may read some areas of this report that may contradict other text. This is due to the fact that many of us show contradictory behaviors in the normal course of our daily operations. Each of us are at times talkative and other times more reflective, depending on how we are adapting our behavior. The expression of these contradictions is a demonstration of the sensitivity of this instrument to determine these subtle differences in our natural and adaptive style.

A closer look at the four components of your behavioral style

Decisive	Interactive	Stabilizing	Cautious
Problems:	**People:**	**Pace:**	**Procedures:**
How you tend to approach problems and make decisions	How you tend to interact with others and share opinions	How you tend to pace things in your environment	Your preference for established protocol/ standards
High D	**High I**	**High S**	**High C**
Demanding	**Gregarious**	**Patient**	**Cautious**
Driving	Persuasive	Predictable	Perfectionist
Forceful	Inspiring	Passive	Systematic
Daring	Enthusiastic	Complacent	Careful
Determined	Sociable	Stable	Analytical
Competitive	Poised	Consistent	Orderly
Responsible	Charming	Steady	Neat
Inquisitive	Convincing	Outgoing	Balanced
Conservative	Reflective	Restless	Independent
Mild	Matter-of-fact	Active	Rebellious
Agreeable	Reserved	Chaotic	Careless
Deliberate	**Introspective**	**Spontaneous**	**Challenging**
Low D	**Low I**	**Low S**	**Low C**

Decisive

Your approach to problem-solving and obtaining results

The D in DISC represents Decisiveness. Your score on this scale, represented below, shows your location on the D spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher D —
Tend to solve new problems very quickly and assertively. They take an active and direct approach to obtaining results. The key here is new problems such as those that are unprecedented or haven't happened before. There may also be an element of risk in taking the wrong approach or developing an incorrect solution, but those with a High D score are willing to take those risks, even if they may be incorrect.

Lower D —
Tend to solve new problems in a more deliberate, controlled, and organized manner. Again, the key here is new and unprecedented problems. The Lower D style will solve routine problems very quickly because the outcomes are already known. But, when the outcomes are unknown and the problem is an uncertain one, the Lower D style will approach the new problem in a calculated and deliberate manner by thinking things through very carefully before acting.

Your score shows a low average score on the 'D' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You prefer a culture that allows ample time for analysis of new ideas before implementation takes place.
- You can be very modest in dealing with others.
- You prefer a work environment that is not too pressured or filled with constant change.
- You are a calculated risk-taker, but only after you have had sufficient time to consider all potential outcomes.
- You are quite self-critical of yourself and demand a lot out of yourself.
- You are open to deferring to others for decisions when they have voiced a stronger opinion.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Interactive

Your approach to interacting with people and display of emotions

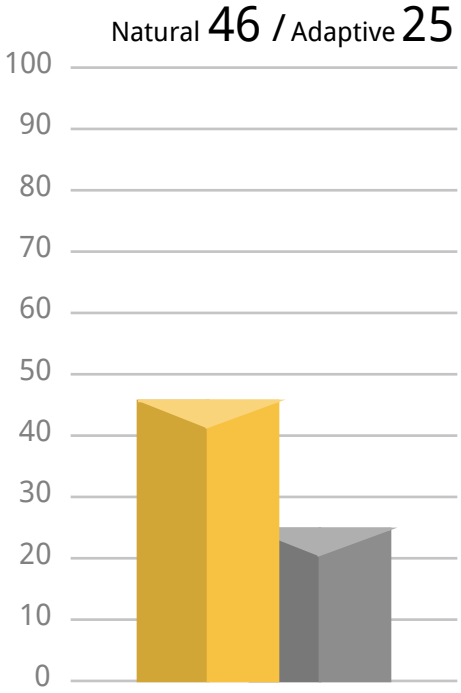

The I in DISC represents Interactive. Your score on this scale represented below shows your location on the I spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher I —

Tend to meet new people in an outgoing, gregarious, and socially assertive manner. The key here is new people whom one hasn't met before. Many other styles are talkative, but more so with people that they've known for some time. The Higher I scores are talkative, interactive and open even with people whom they have just initially met. People scoring in this range may also be a bit impulsive. Generally speaking, those with the Higher I scores are generally talkative and outgoing.

Lower I —

Tend to meet new people in a more controlled, quiet and reserved manner. Here's where the key word "new people" enters the equation. Those with Lower I scores are talkative with their friends and close associates, but tend to be more reserved with people they've just recently met. They tend to place a premium on the control of emotions, and approach new relationships with a more reflective approach than an emotional one.

Your score shows a low average score on the 'I' spectrum. The comments below highlight some of the traits specific to just your unique score.

- While you consider other's emotions, you do not let them fog the bigger issues.
- You like a balance of working alone and working with a team.
- You tend to be a stabilizing force when emotional issues hit the team.
- You tend to be slightly more reflective than talkative.
- Expressing more enthusiasm might help you connect with others more.
- For really important tasks, you may prefer to work alone without too much involvement from others.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Stabilizing

Your approach to the pace of the work environment

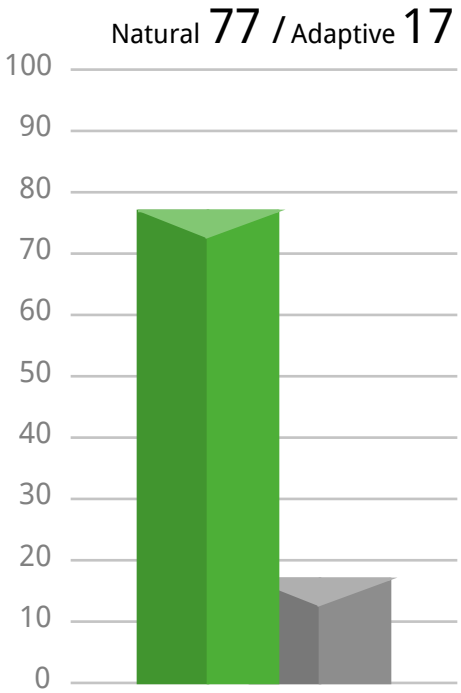

The S in DISC represents Stabilizing. Your score on this scale represented below shows your location on the S spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher S —

Tend to prefer a more controlled, deliberative and predictable environment. They place a premium on security of a work situation and disciplined behavior. They also tend to show a sense of loyalty to a team or organization, and as a result, may have a greater longevity or tenure in a position than some other styles. They have an excellent listening style and are very patient coaches and teachers for others on the team.

Lower S —

Tend to prefer a more flexible, dynamic, unstructured work environment. They value freedom of expression and the ability to change quickly from one activity to another. They tend to become bored with the same routine that brings security to the Higher S traits. As a result, they will seek opportunities and outlets for their high sense of urgency and high activity levels, as they have a preference for spontaneity.

Your score shows a moderately high score on the 'S' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You can be fairly resistant to change.
- You are typically very cool, calm, and collected on the job.
- You always demonstrate a high degree of follow-through.
- You bring a high sense of loyalty to the rules and regulations that govern projects, people, and processes.
- You always present a more relaxed and open approach to your work and how fast you must get it done.
- You may be slow to accept changes or let go of the old ways of doing things.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Cautious

Your approach to standards, procedures, and expectations

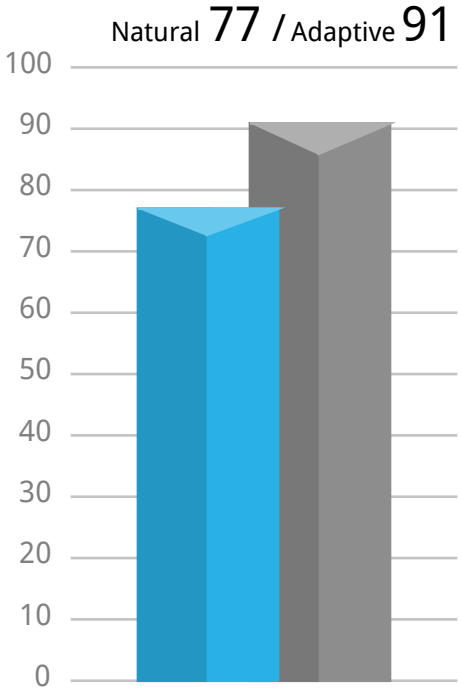

The C in DISC represents Cautiousness. Your score on the scale represented below shows your location on the C spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher C —

Tend to adhere to rules, standards, procedures, and protocol set by those in authority whom they respect. They like things to be done the right way according to the operating manual. "Rules are made to be followed" is an appropriate motto for those with higher C scores. They have some of the highest quality control interests of any of the styles and frequently wish others would do the same.

Lower C —

Tend to operate more independently from the rules and standard operating procedures. They tend to be bottom-line oriented. If they find an easier way to do something, they'll do it by developing a variety of strategies as situations demand. To the Lower C scores, rules are only guidelines, and may be bent or broken as necessary to obtain results.

Your score shows a moderately high score on the 'C' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You desire a great deal of explanation before beginning new tasks.
- You think it is important to adhere to specific and detailed instructions or procedures.
- You like to work in an environment that is very precise and more structured.
- You may be perceived as somewhat resistant to change.
- You believe in maintaining high standards of quality control.
- You possess excellent critical thinking and problem solving ability.

Natural Style Pattern:

Your natural style is the way you tend to behave when you aren't thinking about it. This is where you are most comfortable (natural). This is also the style you will revert back to when under stress or moving too quickly to be consciously thinking about modifying your behavior. Finally, this is the style you should seek to be true to in your daily roles. Being natural will return better results with less effort and stress. The following statements are true to just your unique natural style:

- Brings a high degree of competence in product and process knowledge.
- You tend to judge others by objective standards, and want to be evaluated yourself by specific criteria that is provided, preferably in writing.
- Appreciates security in projects, systems, and the job culture. Much of that security may be achieved by maintaining high standards of operational quality.
- Has a high sense of 'neatness' in the organizational workspace and at home. Everything in its place is preferred over clutter of some other style preferences.
- You bring a very high level of conscientiousness and follow-through in working on detailed projects and complex assignments.
- You score like those who appreciate an occasional word of reassurance from their supervisor or board, as long as it is sincere input.
- May tend to get bogged down in details during some decision-making processes. The reason is that you may keep the data-gate open too long. There may be more information forthcoming that might impact the direction of the decision.
- Persuades others on the team by careful attention to detail, and through facts, data, and logic, not emotion.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Adaptive Style Pattern:

This is the style of behavior you adapt to when you are conscious of your own behavior, when you feel you are being observed or whenever you are trying to better fit a situation. This is not a natural style for you, but still one of your two styles none-the-less. In other words, it is the way you feel you "should" behave when thinking about it. The statements below are specific to your individual Adaptive style:

- In work situations you are somewhat conventional, and a bit cautious about sudden decisions that impact quality or policy.
- May show a lower trust level with newer people in the organization until they have established their credibility.
- You set high quality control standards, for yourself and others, in order to minimize mistakes.
- May be somewhat difficult to get to know on a personal level, because of not being extremely verbal with others, unless in a small group environment.
- The High C preferences show that you are one who is motivated to demonstrate a high degree of quality control awareness in all projects and processes.
- Highly aware of the dangers of making mistakes through hasty decisions.
- Sets an example for others in being systematic and logical in developing procedures.
- May not verbalize criticism unless asked, at which point you may become a wealth of practical information and ideas.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on your behavioral style there are certain opportunities for becoming more effective by being aware of how you prefer, and enjoy, to behave. The items below may assist you in your professional development growth. By understanding these items you may find explanations for why you may be stuck in some areas of your life and why other aspects give you no trouble at all. You could be more effective by:

- Working with others who have a high level of quality-orientation.
- Being more confident in your own decision-making ability.
- An environment with minimal sudden changes and crises.
- Sufficient time for effective planning.
- Sufficient time to consider alternatives prior to making changes.
- Complete explanations of the nature of a process, and the systems used for completion.
- Having an increased sense of urgency in making decisions. To be able to shut the data-gate and make a decision based on the information currently available.
- Options for making your own changes to certain methods or procedures to increase efficiency.

John Ilagan

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style will cause you to be motivated by certain factors in your environment. Having these present may make you feel more motivated, and productive. The following are things that you may want in your surroundings to feel optimally motivated:

- To be included as a part of the work group in social functions.
- Work tasks of a highly specialized nature to support your natural curiosity and detail orientation.
- A work environment with minimal hostility and pressure that sometimes reduce quality and effectiveness.
- Quality control standard that are adhered to by all members of the organization, not just by a few people.
- Sufficient time to consider all options before making a final decision.
- Changes should be controlled changes, and made only when proven to be necessary changes.
- Standard operating procedures that can support a quality initiative without being changed dramatically.
- Detailed examples and specific information about suggested changes to be made in processes that may have an impact on quality.

John Ilagan

Each behavioral style contains certain unique strengths as a result of how your four behavioral dimensions relate to each other. Understanding your own unique behavioral strengths is an important part of putting your new level of self-awareness to work for your success and satisfaction. The following statements highlight specific strengths of your behavioral style:

- Patient in working with others on the team, and demonstrating appropriate methods for completing a project with attention to details.
- Provides an objective reality-focused view of systems, procedures, and organizational operations.
- Especially careful that there are no loose ends on a project or process that may have been overlooked by others.
- May be sought after by other members of the team because of your high knowledge-base of processes and procedures.
- Tactful in explaining ideas that may impact others on the team.
- Provides a heavy mind-share on projects and ideas. Considers possible areas of trouble that others on the team may have overlooked.
- You score like those who take their responsibilities seriously, and exercise their authority in a sincere and conscientious manner.
- A strong guardian of high quality control standards and procedures.

John Ilagan

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style plays a significant role in determining what aspects of an environment you like. The items below will help you understand what will define an ideal working climate for you. Based on how you prefer to behave, an ideal climate for you is one that provides you with:

- Freedom from intense time-pressured decisions.
- Projects completed the 'right way' the first time, to avoid problems later on.
- A work group providing close relationships with a small group of associates, rather than superficial relationships with a large group of people.
- Activities that can be monitored from beginning to end.
- Security in the work setting to maintain high quality control standards.
- Highly specialized assignments and technical areas of responsibility.
- An environment that supports your critical thinking skills.
- Complete information, details, and examples with no gaps or surprises.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Along with strengths, all behavioral styles come with areas that could become weaknesses - if depended upon or not acknowledged. The trick is not to manufacture a weakness in the first place by depending on these things.

Here are a few items that could become problematic for you if not acknowledged or known. Your awareness of the potentials below is your best step in making sure they remain only potential problems. Due to your behavioral style, you may tend to:

- May be too tightly linked to established procedures and tradition, even when more efficient and effective methods become available.
- Could demonstrate a bit more spontaneity, and take yourself a bit less seriously.
- May be perceived by some as being overly rigid, inflexible, and strict regarding procedures and options.
- May sometimes be overly dependent on a very few people who share a similar quality control focus, to the exclusion of others on the team who may also provide valuable input and ideas.
- May be perceived by others as very private, guarded, shy, and undemonstrative.
- Could use involvement and interaction with a wider variety of people, not just those like yourself.
- May sometimes use facts, figures, and details as a 'security blanket' to avoid objections, confrontation, or hostility.
- May spend more time than necessary in preparing your 'case' due to fear of the unexpected, or being seen as under prepared.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on how you tend to behave you have certain preferences for how you like to convey information, teach, instruct or share knowledge with others. This is also true of how you like to receive information and learn. Understanding your behavioral preferences here will help increase your effectiveness in teaching or instructing others, and in being taught and learning.

How you prefer to share knowledge or teach:

- Comes to the training / facilitation event very well prepared, and ready to go.
- Helps group create new concepts and models of ideas.
- Excellent note-taking, record-keeping, and journaling.
- Shows authority by demonstrating trust and participation with the group.
- Wants to provide participants with the ability to understand principles and concepts.
- Shows patience with tedious, technical, or specialty tasks, and when helping others to learn.
- Presents detailed information in a logical and sequential manner.

How you prefer to receive knowledge or learn:

- Looks for meaning and clear integration of the learning activities.
- Sincere participation with others. Wants to learn and help others learn as well.
- Wants to know performance outcomes, objectives up front.
- Collects data and analyzes information.
- Excellent note-taking, record-keeping, and journaling.
- You will structure your own activities only with explicit goals and outcomes established.
- Needs details and time to reflect on learning.

Copyright 2026 Innermetrix Incorporated • All rights reserved

This page is unique in this report because it is the only one that doesn't speak directly to you, rather to those who interact with you. The information below will help others communicate with you more effectively by appealing to your natural behavioral style. The first items are things others SHOULD do to be better understood by you (Do's) and the second list is of things others SHOULD NOT do (Don'ts) if they want you to understand them well.

Things to do to effectively communicate with you:

- List pros and cons to suggestions you make.
- If you agree with the outcome, follow through and do what you say you will do.
- If you say you're going to do something, do it.
- Outline individual tasks and responsibilities in writing.
- Be certain that individual responsibilities are clear, and there are no ambiguities.
- Find some areas of common interest and involvement.
- Provide time to verify the issues and potential outcomes.

Things to avoid to effectively communicate with you:

- Don't be vague or ambiguous.
- Don't manipulate or bully others into agreeing.
- Don't be rude, abrupt, or too fast-paced in your delivery.
- If you disagree don't let it reflect on others personally, and don't let it affect the relationship.
- Don't use quick manipulations of ideas.
- Don't whine about all of the work you have to do.
- Don't push too hard.

In order to make the most out of the information in this report it is important that you connect it to your life in a tangible way. To help you make this information your own, and pull out the most relevant parts, fill in the blanks below.

Decisiveness:
How is your 'D' score relevant to your life?

_____

Interacting:
How is your 'I' score relevant to your life?

_____

Stabilizing:
How is your 'S' score relevant to your life?

_____

Cautiousness:
How is your 'C' score relevant to your life?

_____

Overall Natural Style:
What is one way in which your natural style relates to your life?

_____

Overall Adaptive Style:
What is one way in which your adaptive style relates to your life?

_____

Strength-based insights:
What specific strengths do you think connect to your success more than any other?

_____

Copyright 2026 Innermetrix Incorporated • All rights reserved

Communication Dos and Don'ts:

What did you learn from understanding your preferred communication style?

_____

Ideal Job Climate:

How well does your current climate fit your behavioral style?

_____

Effectiveness:

What is one way in which you could become more effective?

_____

Motivation:

How can you stay more motivated?

_____

Improvement:

What is something you learned that you can use to improve your performance?

_____

Training/Learning:

What did you learn that could help you instruct others better, or learn more effectively?

_____
