

DISC INDEX

Manuel James Sesaldo

March 14, 2026

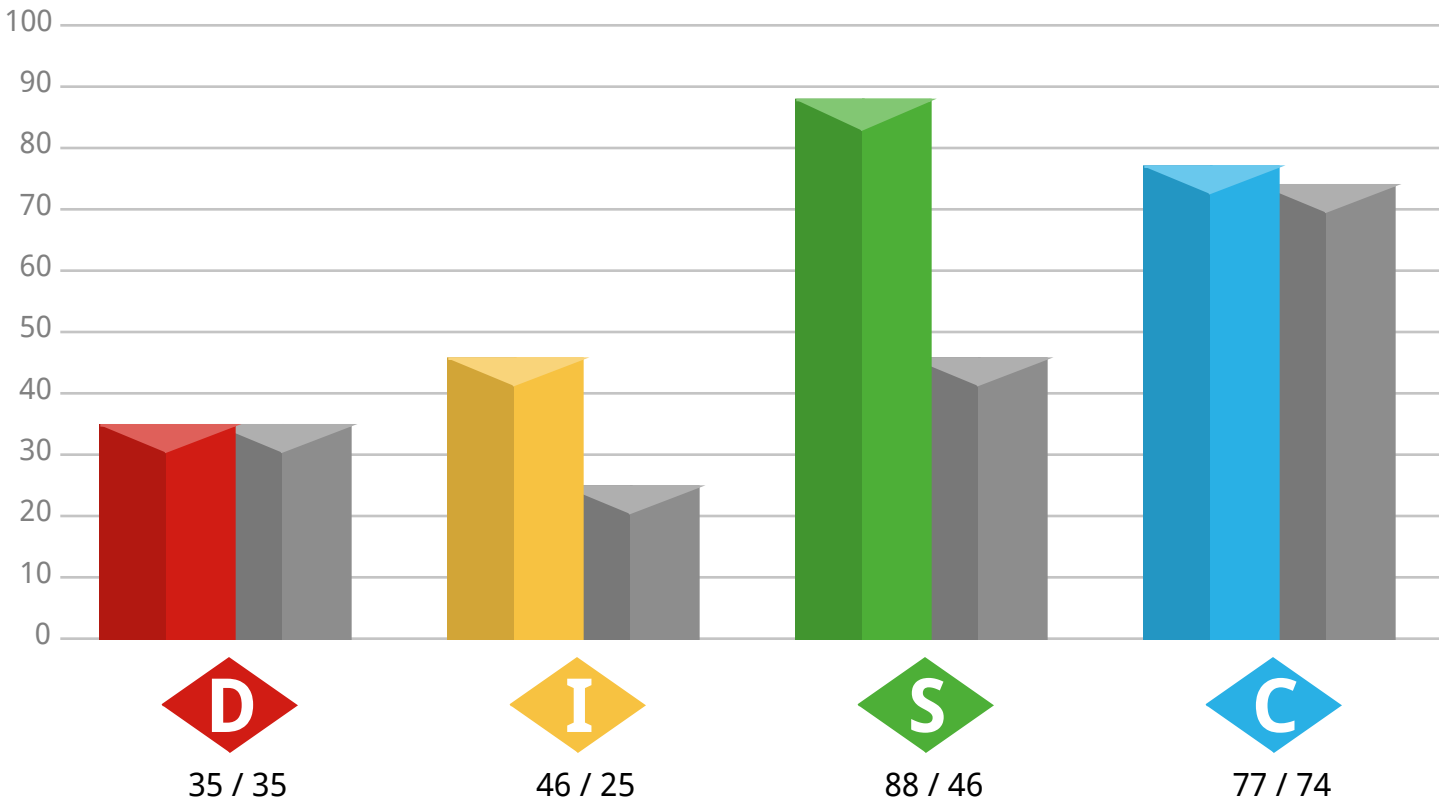

This Innermetrix Disc Index was authored by Jay Niblick, the Founder and CEO of Innermetrix. It is a modern interpretation of Dr. William Marston's behavioral dimensions. Marston's research uncovered four quadrants of behavior which help to understand a person's behavioral preferences. This Disc Index will help you understand your behavioral style and how to maximize your potential.

Natural and Adaptive Styles Comparison

Natural Style: The natural style is how you behave when you are being most natural. It is your basic style and the one you adopt when you are being authentic and true to yourself. It is also the style that you revert to when under stress or pressure. Behaving in this style, however, reduces your stress and tension and is comforting. When authentic to this style you will maximize your true potential more effectively.

Adaptive Style:
The adaptive style is how you behave when you feel you are being observed or how you behave when you are aware of your behavior. This style is less natural and less authentic for you or your true tendencies and preferences. When forced to adapt to this style for too long you may become stressed and less effective.

About This Report

Research conducted by Innermetrix shows that the most successful people share the common trait of self-awareness. They recognize the situations that will make them successful, and this makes it easy for them to find ways of achieving objectives that fit their behavioral style. They also understand their limitations and where they are not effective and this helps them understand where not to go or how not to be as well. Those who understand their natural behavioral preferences are far more likely to pursue the right opportunities, in the right way, at the right time, and get the results they desire.

This report measures four dimensions of your behavioral style. They are:

- **D**ecisive — your preference for problem solving and getting results
- **I**nteractive — your preference for interacting with others and showing emotion
- **S**tability — your preference for pacing, persistence and steadiness
- **C**autious — your preference for procedures, standards and protocols

This report includes:

- **The Elements of DISC** — Educational background behind the profile, the science and the four dimensions of behavior
- **The DISC Dimensions** — A closer look at each of your four behavioral dimensions
- **Style Summary** — A comparison of your natural and adaptive behavioral styles
- **Behavioral Strengths** — A detailed strengths-based description of your overall behavioral style
- **Communication** — Tips on how you like to communicate and be communicated with
- **Ideal Job Climate** — Your ideal work environment
- **Effectiveness** — Insights into how you can be more effective by understanding your behavior
- **Behavioral Motivations** — Ways to ensure your environment is motivational
- **Continual Improvement** — Areas where you can focus on improving
- **Training & Learning Style** — Your preferred means of sharing and receiving styles
- **Relevance Section** — Making the information real and pertinent to you
- **Success Connection** — Connecting your style to your own life

The Elements of the DISC-Index

This DISC-Index report is unique in the marketplace for a number of reasons. You just completed the first ever click & drag DISC instrument on the market. This was constructed in a precise manner to allow for ease of responses, even in the midst of many difficult decisions. This intuitive interface allows you to focus on your answers, not the process.

Also, unlike other DISC instruments, this instrument allows you to rank all four items instead. As a result, this instrument produces zero waste in responses. Some instruments ask you to choose two items out of four, and leave two items blank. Those instruments have a 50% waste of terms, and do not provide for an efficient response process. The DISC Index instrument eliminates that response problem.

Another unique aspect of this DISC-Index report is that we present the DISC aspects of your behavior both as separate entities and as a dynamic combination of traits. This report presents the first time that each of the DISC elements are separated and developed as pure entities of themselves. This can serve as an important learning tool as you explore the deeper aspects of DISC. Your unique pattern of DISC traits is developed through the context of this report. Additionally, the following four pages will be devoted to exploring your DISC scores as separate components within the unique combination of traits that you exhibit.

A comment on contradictions: You may read some areas of this report that may contradict other text. This is due to the fact that many of us show contradictory behaviors in the normal course of our daily operations. Each of us are at times talkative and other times more reflective, depending on how we are adapting our behavior. The expression of these contradictions is a demonstration of the sensitivity of this instrument to determine these subtle differences in our natural and adaptive style.

A closer look at the four components of your behavioral style

Decisive	Interactive	Stabilizing	Cautious
Problems:	**People:**	**Pace:**	**Procedures:**
How you tend to approach problems and make decisions	How you tend to interact with others and share opinions	How you tend to pace things in your environment	Your preference for established protocol/ standards
High D	**High I**	**High S**	**High C**
Demanding	**Gregarious**	**Patient**	**Cautious**
Driving	Persuasive	Predictable	Perfectionist
Forceful	Inspiring	Passive	Systematic
Daring	Enthusiastic	Complacent	Careful
Determined	Sociable	Stable	Analytical
Competitive	Poised	Consistent	Orderly
Responsible	Charming	Steady	Neat
Inquisitive	Convincing	Outgoing	Balanced
Conservative	Reflective	Restless	Independent
Mild	Matter-of-fact	Active	Rebellious
Agreeable	Reserved	Chaotic	Careless
Deliberate	**Introspective**	**Spontaneous**	**Challenging**
Low D	**Low I**	**Low S**	**Low C**

Decisive

Your approach to problem-solving and obtaining results

The D in DISC represents Decisiveness. Your score on this scale, represented below, shows your location on the D spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher D —
Tend to solve new problems very quickly and assertively. They take an active and direct approach to obtaining results. The key here is new problems such as those that are unprecedented or haven't happened before. There may also be an element of risk in taking the wrong approach or developing an incorrect solution, but those with a High D score are willing to take those risks, even if they may be incorrect.

Lower D —
Tend to solve new problems in a more deliberate, controlled, and organized manner. Again, the key here is new and unprecedented problems. The Lower D style will solve routine problems very quickly because the outcomes are already known. But, when the outcomes are unknown and the problem is an uncertain one, the Lower D style will approach the new problem in a calculated and deliberate manner by thinking things through very carefully before acting.

Your score shows a moderately low score on the 'D' spectrum. The comments below highlight some of the traits specific to just your unique score.

- Unless completely wrong, you prefer to support decisions made by others rather than argue or disagree.
- You like to carefully weigh the pros and cons on important issues before forming an opinion.
- You might be hesitant to make important decisions quickly under time pressure.
- You may be prone to avoiding difficult decisions, and this can create delays.
- You may be somewhat conservative in decision-making on important issues.
- When you lead, you tend to do so by doing, not by delegating.

Copyright 2026 Innermetrix Incorporated • All rights reserved

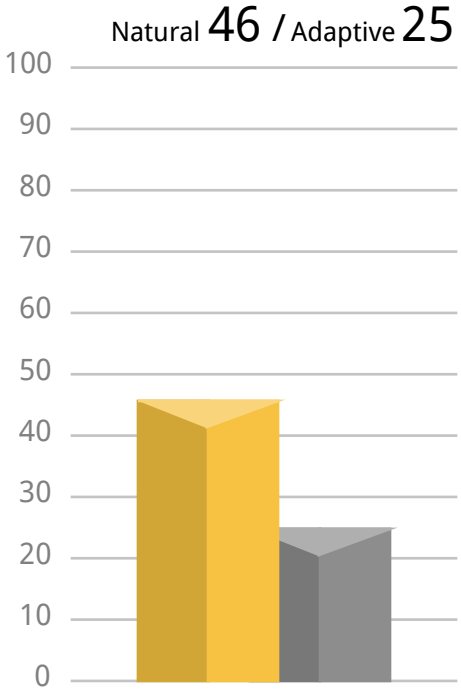

Interactive

Your approach to interacting with people and display of emotions

The I in DISC represents Interactive. Your score on this scale represented below shows your location on the I spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher I —
Tend to meet new people in an outgoing, gregarious, and socially assertive manner. The key here is new people whom one hasn't met before. Many other styles are talkative, but more so with people that they've known for some time. The Higher I scores are talkative, interactive and open even with people whom they have just initially met. People scoring in this range may also be a bit impulsive. Generally speaking, those with the Higher I scores are generally talkative and outgoing.

Lower I —
Tend to meet new people in a more controlled, quiet and reserved manner. Here's where the key word "new people" enters the equation. Those with Lower I scores are talkative with their friends and close associates, but tend to be more reserved with people they've just recently met. They tend to place a premium on the control of emotions, and approach new relationships with a more reflective approach than an emotional one.

Your score shows a low average score on the 'I' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You tend to be slightly more reflective than talkative.
- You are able to persuade others in a convincing manner when necessary.
- While you consider other's emotions, you do not let them fog the bigger issues.
- Make sure to encourage others in a more vocal or open way.
- Your amicable approach means you may be hard to really "read."
- You sincerely like to support and work with others.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Stabilizing

Your approach to the pace of the work environment

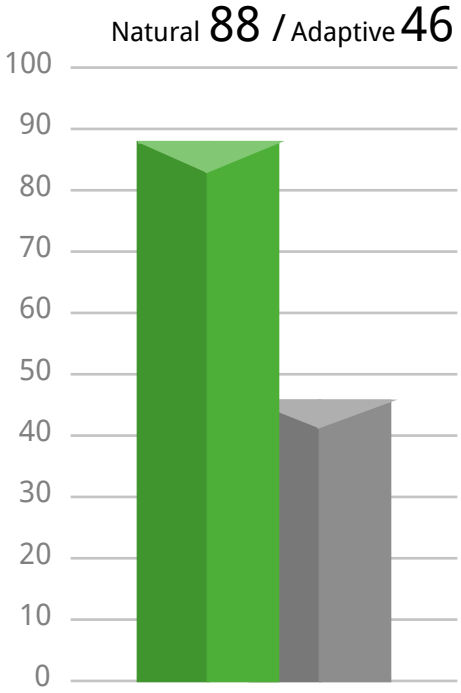

The S in DISC represents Stabilizing. Your score on this scale represented below shows your location on the S spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher S —

Tend to prefer a more controlled, deliberative and predictable environment. They place a premium on security of a work situation and disciplined behavior. They also tend to show a sense of loyalty to a team or organization, and as a result, may have a greater longevity or tenure in a position than some other styles. They have an excellent listening style and are very patient coaches and teachers for others on the team.

Lower S —

Tend to prefer a more flexible, dynamic, unstructured work environment. They value freedom of expression and the ability to change quickly from one activity to another. They tend to become bored with the same routine that brings security to the Higher S traits. As a result, they will seek opportunities and outlets for their high sense of urgency and high activity levels, as they have a preference for spontaneity.

Your score shows a very high score on the 'S' spectrum. The comments below highlight some of the traits specific to just your unique score.

- Even in the midst of chaos or high tensions, you are usually very cool, calm, and serene (or at least you are perceived as such on the outside).
- You desire a high level of structure and order.
- You are always seen as cool, calm, and collected on the outside (whether that is true on the inside or not).
- You dislike any personal conflicts or hostility of any kind.
- You are very patient in working with a wide variety of people.
- You're not great at letting things go (e.g., original decisions, long held beliefs, etc).

Copyright 2026 Innermetrix Incorporated • All rights reserved

Cautious

Your approach to standards, procedures, and expectations

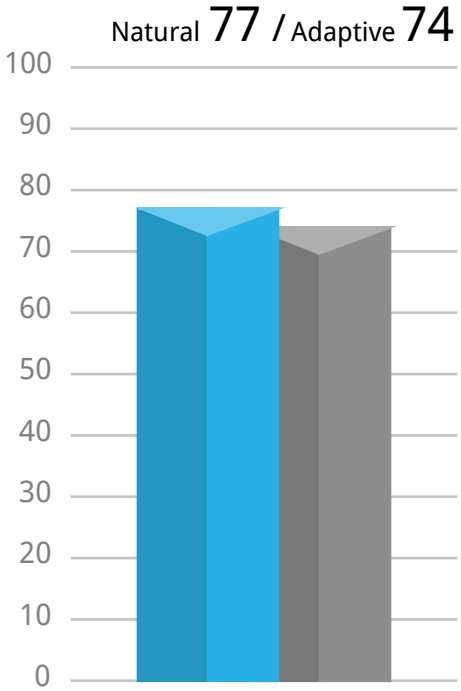

The C in DISC represents Cautiousness. Your score on the scale represented below shows your location on the C spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher C —

Tend to adhere to rules, standards, procedures, and protocol set by those in authority whom they respect. They like things to be done the right way according to the operating manual. "Rules are made to be followed" is an appropriate motto for those with higher C scores. They have some of the highest quality control interests of any of the styles and frequently wish others would do the same.

Lower C —

Tend to operate more independently from the rules and standard operating procedures. They tend to be bottom-line oriented. If they find an easier way to do something, they'll do it by developing a variety of strategies as situations demand. To the Lower C scores, rules are only guidelines, and may be bent or broken as necessary to obtain results.

Your score shows a moderately high score on the 'C' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You desire a great deal of explanation before beginning new tasks.
- You are somewhat restrained in expressing emotions.
- You like to use a lot of detail when explaining processes and tasks to others.
- You may be perceived as somewhat resistant to change.
- You believe in maintaining high standards of quality control.
- You are excellent at gathering detailed information and examples.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Natural Style Pattern:

Your natural style is the way you tend to behave when you aren't thinking about it. This is where you are most comfortable (natural). This is also the style you will revert back to when under stress or moving too quickly to be consciously thinking about modifying your behavior. Finally, this is the style you should seek to be true to in your daily roles. Being natural will return better results with less effort and stress. The following statements are true to just your unique natural style:

- You tend to judge others by objective standards, and want to be evaluated yourself by specific criteria that is provided, preferably in writing.
- Others on the team may seek you out to answer a detailed question for them. (The word about your high competence and knowledge-base gets around the organization quickly.)
- You bring a very high level of conscientiousness and follow-through in working on detailed projects and complex assignments.
- There is a right way and a wrong way to complete all projects. Let's complete it the right way the first time.
- Evaluates others by their own use of procedures, standards, and quality action.
- You tend to be restrained and reticent in showing emotions, and you may not be extremely verbal at a team or organizational meeting, unless asked for input or if the topic is one of high importance to you.
- When taking risks, you score like those who take calculated, educated risks only after a thoughtful analysis of the facts and data, and have analyzed options and potential outcomes.
- Appreciates security in projects, systems, and the job culture. Much of that security may be achieved by maintaining high standards of operational quality.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Adaptive Style Pattern:

This is the style of behavior you adapt to when you are conscious of your own behavior, when you feel you are being observed or whenever you are trying to better fit a situation. This is not a natural style for you, but still one of your two styles none-the-less. In other words, it is the way you feel you "should" behave when thinking about it. The statements below are specific to your individual Adaptive style:

- Demonstrates precise time management, and enjoys meetings most when they begin and end on time.
- Highly aware of the dangers of making mistakes through hasty decisions.
- You like to be aware of the rules, procedures and protocol so that you can follow them. You may display disappointment when others don't follow the same standards.
- May be somewhat difficult to get to know on a personal level, because of not being extremely verbal with others, unless in a small group environment.
- The High C preferences show that you are one who is motivated to demonstrate a high degree of quality control awareness in all projects and processes.
- Sets an example for others in being systematic and logical in developing procedures.
- You set high quality control standards, for yourself and others, in order to minimize mistakes.
- Sees the need to move quickly, but also the importance of analyzing facts and data before deciding.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on your behavioral style there are certain opportunities for becoming more effective by being aware of how you prefer, and enjoy, to behave. The items below may assist you in your professional development growth. By understanding these items you may find explanations for why you may be stuck in some areas of your life and why other aspects give you no trouble at all. You could be more effective by:

- An environment with minimal sudden changes and crises.
- Greater participation in team efforts and activities.
- Work assignments of high precision and accuracy to capitalize on your high detail orientation.
- Complete explanations of the nature of a process, and the systems used for completion.
- Sufficient time to consider alternatives prior to making changes.
- Working with others who have a high level of quality-orientation.
- Options for making your own changes to certain methods or procedures to increase efficiency.
- Increased authority to delegate routine tasks and procedures to those you know and trust.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style will cause you to be motivated by certain factors in your environment. Having these present may make you feel more motivated, and productive. The following are things that you may want in your surroundings to feel optimally motivated:

- A work environment with minimal hostility and pressure that sometimes reduce quality and effectiveness.
- Complete explanations of systems and processes that impact your work environment.
- Sufficient time to consider all options before making a final decision.
- Standard operating procedures that can support a quality initiative without being changed dramatically.
- Tasks completed the 'right' way the first time, so that errors don't have to be corrected later.
- To be included as a part of the work group in social functions.
- Quality control standard that are adhered to by all members of the organization, not just by a few people.
- Detailed examples and specific information about suggested changes to be made in processes that may have an impact on quality.

Manuel James Sesaldo

Each behavioral style contains certain unique strengths as a result of how your four behavioral dimensions relate to each other. Understanding your own unique behavioral strengths is an important part of putting your new level of self-awareness to work for your success and satisfaction. The following statements highlight specific strengths of your behavioral style:

- May be sought after by other members of the team because of your high knowledge-base of processes and procedures.
- Patient in working with others on the team, and demonstrating appropriate methods for completing a project with attention to details.
- High degree of accuracy while keeping an ear to the project-clock and time-line.
- High degree of technical specialty and skill in your area of expertise.
- Provides a heavy mind-share on projects and ideas. Considers possible areas of trouble that others on the team may have overlooked.
- Excellent, considerate, and analytic listening style.
- Very high degree of quality control and detail orientation.
- Tactful in explaining ideas that may impact others on the team.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style plays a significant role in determining what aspects of an environment you like. The items below will help you understand what will define an ideal working climate for you. Based on how you prefer to behave, an ideal climate for you is one that provides you with:

- Freedom from intense time-pressured decisions.
- Time to reflect and think about the pros and cons of solutions.
- Complete information, details, and examples with no gaps or surprises.
- Activities that can be monitored from beginning to end.
- Security in the work setting to maintain high quality control standards.
- Quality standards in which to support and maintain.
- A work group providing close relationships with a small group of associates, rather than superficial relationships with a large group of people.
- Complete explanations of areas of responsibility and control.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Along with strengths, all behavioral styles come with areas that could become weaknesses - if depended upon or not acknowledged. The trick is not to manufacture a weakness in the first place by depending on these things.

Here are a few items that could become problematic for you if not acknowledged or known. Your awareness of the potentials below is your best step in making sure they remain only potential problems. Due to your behavioral style, you may tend to:

- May sometimes be overly dependent on a very few people who share a similar quality control focus, to the exclusion of others on the team who may also provide valuable input and ideas.
- May be too tightly linked to established procedures and tradition, even when more efficient and effective methods become available.
- May sometimes oversell on standard operating procedure, rules, or regulations.
- Could demonstrate more openness to new ideas and innovations.
- Could use involvement and interaction with a wider variety of people, not just those like yourself.
- Could warm up a bit more when meeting new people or talking with those not intimately involved in your immediate work.
- Could benefit from a greater degree of self-confidence and an increased sense of urgency to accomplish activities in a tighter timeline.
- May be perceived by others as very private, guarded, shy, and undemonstrative.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on how you tend to behave you have certain preferences for how you like to convey information, teach, instruct or share knowledge with others. This is also true of how you like to receive information and learn. Understanding your behavioral preferences here will help increase your effectiveness in teaching or instructing others, and in being taught and learning.

How you prefer to share knowledge or teach:

- Helps group create new concepts and models of ideas.
- Very accurate in presenting information.
- Wants to provide participants with the ability to understand principles and concepts.
- Brings imagination and ideas to the training event.
- Prefers explicit instructions and measurement criteria to be established with the participants.
- Sincere participation with others as a co-learner or co-facilitator.
- Balances individual and group work for the participants.

How you prefer to receive knowledge or learn:

- Shows commitment, and wants to be personally involved in learning.
- Can balance both individual work and group interaction.
- High perseverance in learning mode, and will re-analyze facts until clarity emerges.
- Wants to know what the experts think about the topic area or subject.
- Shows patience with tedious, technical, and specialty tasks. Does independent practice as well as working with others.
- Prefers traditional learning structure and activities.
- Excellent note-taking, record-keeping, and journaling.

Copyright 2026 Innermetrix Incorporated • All rights reserved

This page is unique in this report because it is the only one that doesn't speak directly to you, rather to those who interact with you. The information below will help others communicate with you more effectively by appealing to your natural behavioral style. The first items are things others SHOULD do to be better understood by you (Do's) and the second list is of things others SHOULD NOT do (Don'ts) if they want you to understand them well.

Things to do to effectively communicate with you:

- Ask 'how' oriented questions to explore opinions.
- Make an organized appeal for support and contributions.
- Take your time to be precise and thorough.
- Provide a specific, step-by-step timetable with names and responsibilities.
- Outline individual tasks and responsibilities in writing.
- Provide time to verify the issues and potential outcomes.
- Be candid, open, and patient.

Things to avoid to effectively communicate with you:

- Don't fail to follow through. If you say you're going to do something, do it.
- Don't rush the issues or the decision-making process.
- Don't leave the idea or plan without backup support.
- Don't push too hard.
- Don't leave things up in the air, or to work out by chance.
- Don't force others to agree quickly with your objectives and position; provide some time to warm up to the ideas and for mutual ownership.
- Don't be vague or ambiguous.

In order to make the most out of the information in this report it is important that you connect it to your life in a tangible way. To help you make this information your own, and pull out the most relevant parts, fill in the blanks below.

Decisiveness:
How is your 'D' score relevant to your life?

_____

Interacting:
How is your 'I' score relevant to your life?

_____

Stabilizing:
How is your 'S' score relevant to your life?

_____

Cautiousness:
How is your 'C' score relevant to your life?

_____

Overall Natural Style:
What is one way in which your natural style relates to your life?

_____

Overall Adaptive Style:
What is one way in which your adaptive style relates to your life?

_____

Strength-based insights:
What specific strengths do you think connect to your success more than any other?

_____

Manuel James Sesaldo
