

Vincent Jones Roxas

March 13, 2026

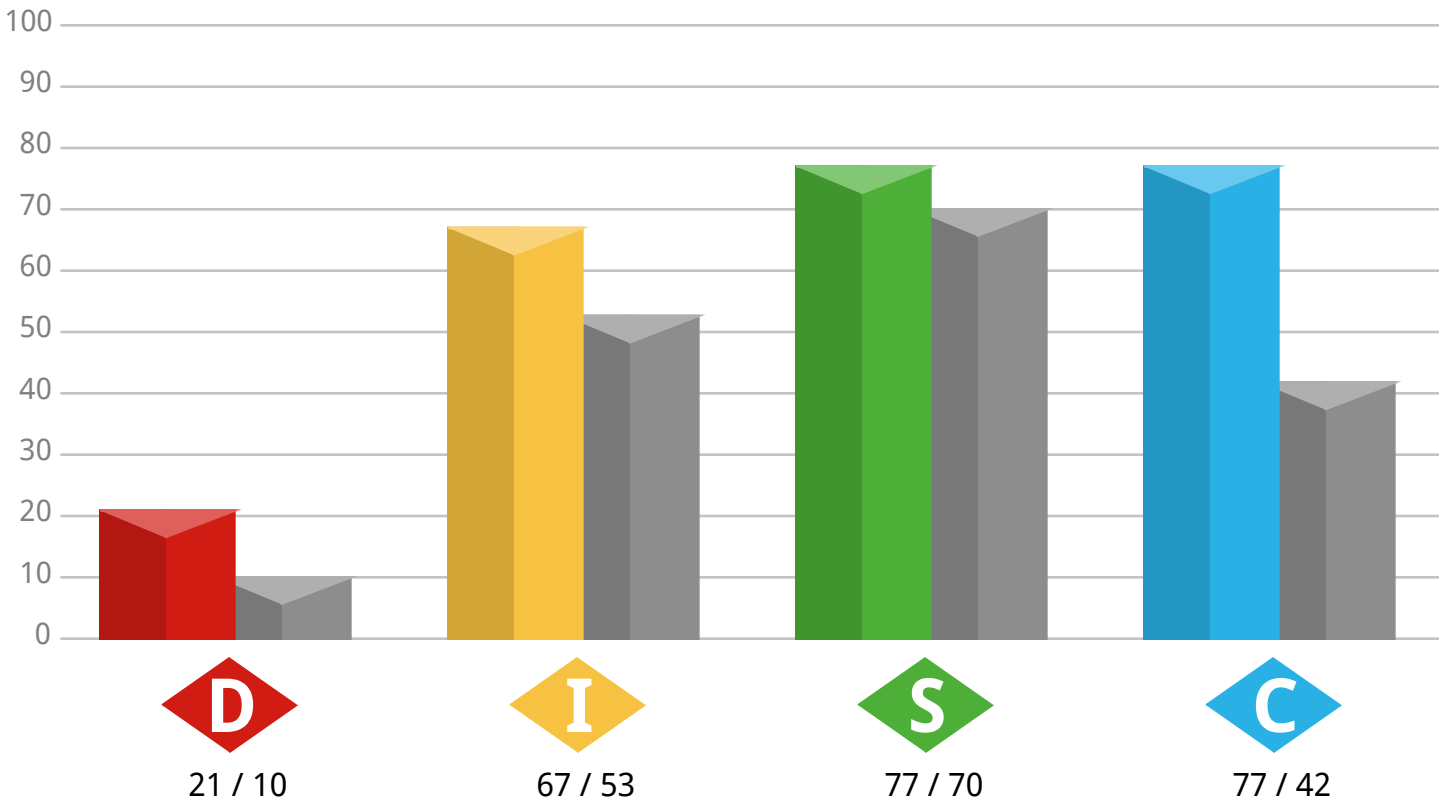

This Innermetrix Disc Index was authored by Jay Niblick, the Founder and CEO of Innermetrix. It is a modern interpretation of Dr. William Marston's behavioral dimensions. Marston's research uncovered four quadrants of behavior which help to understand a person's behavioral preferences. This Disc Index will help you understand your behavioral style and how to maximize your potential.

Natural and Adaptive Styles Comparison

21 / 10 | 67 / 53 | 77 / 70 | 77 / 42

Natural Style: The natural style is how you behave when you are being most natural. It is your basic style and the one you adopt when you are being authentic and true to yourself. It is also the style that you revert to when under stress or pressure. Behaving in this style, however, reduces your stress and tension and is comforting. When authentic to this style you will maximize your true potential more effectively.

Adaptive Style:
The adaptive style is how you behave when you feel you are being observed or how you behave when you are aware of your behavior. This style is less natural and less authentic for you or your true tendencies and preferences. When forced to adapt to this style for too long you may become stressed and less effective.

About This Report

Research conducted by Innermetrix shows that the most successful people share the common trait of self-awareness. They recognize the situations that will make them successful, and this makes it easy for them to find ways of achieving objectives that fit their behavioral style. They also understand their limitations and where they are not effective and this helps them understand where not to go or how not to be as well. Those who understand their natural behavioral preferences are far more likely to pursue the right opportunities, in the right way, at the right time, and get the results they desire.

This report measures four dimensions of your behavioral style. They are:

- **D**ecisive — your preference for problem solving and getting results
- **I**nteractive — your preference for interacting with others and showing emotion
- **S**tability — your preference for pacing, persistence and steadiness
- **C**autious — your preference for procedures, standards and protocols

This report includes:

- **The Elements of DISC** — Educational background behind the profile, the science and the four dimensions of behavior
- **The DISC Dimensions** — A closer look at each of your four behavioral dimensions
- **Style Summary** — A comparison of your natural and adaptive behavioral styles
- **Behavioral Strengths** — A detailed strengths-based description of your overall behavioral style
- **Communication** — Tips on how you like to communicate and be communicated with
- **Ideal Job Climate** — Your ideal work environment
- **Effectiveness** — Insights into how you can be more effective by understanding your behavior
- **Behavioral Motivations** — Ways to ensure your environment is motivational
- **Continual Improvement** — Areas where you can focus on improving
- **Training & Learning Style** — Your preferred means of sharing and receiving styles
- **Relevance Section** — Making the information real and pertinent to you
- **Success Connection** — Connecting your style to your own life

The Elements of the DISC-Index

This DISC-Index report is unique in the marketplace for a number of reasons. You just completed the first ever click & drag DISC instrument on the market. This was constructed in a precise manner to allow for ease of responses, even in the midst of many difficult decisions. This intuitive interface allows you to focus on your answers, not the process.

Also, unlike other DISC instruments, this instrument allows you to rank all four items instead. As a result, this instrument produces zero waste in responses. Some instruments ask you to choose two items out of four, and leave two items blank. Those instruments have a 50% waste of terms, and do not provide for an efficient response process. The DISC Index instrument eliminates that response problem.

Another unique aspect of this DISC-Index report is that we present the DISC aspects of your behavior both as separate entities and as a dynamic combination of traits. This report presents the first time that each of the DISC elements are separated and developed as pure entities of themselves. This can serve as an important learning tool as you explore the deeper aspects of DISC. Your unique pattern of DISC traits is developed through the context of this report. Additionally, the following four pages will be devoted to exploring your DISC scores as separate components within the unique combination of traits that you exhibit.

A comment on contradictions: You may read some areas of this report that may contradict other text. This is due to the fact that many of us show contradictory behaviors in the normal course of our daily operations. Each of us are at times talkative and other times more reflective, depending on how we are adapting our behavior. The expression of these contradictions is a demonstration of the sensitivity of this instrument to determine these subtle differences in our natural and adaptive style.

Decisive

Your approach to problem-solving and obtaining results

The D in DISC represents Decisiveness. Your score on this scale, represented below, shows your location on the D spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher D —
Tend to solve new problems very quickly and assertively. They take an active and direct approach to obtaining results. The key here is new problems such as those that are unprecedented or haven't happened before. There may also be an element of risk in taking the wrong approach or developing an incorrect solution, but those with a High D score are willing to take those risks, even if they may be incorrect.

Lower D —
Tend to solve new problems in a more deliberate, controlled, and organized manner. Again, the key here is new and unprecedented problems. The Lower D style will solve routine problems very quickly because the outcomes are already known. But, when the outcomes are unknown and the problem is an uncertain one, the Lower D style will approach the new problem in a calculated and deliberate manner by thinking things through very carefully before acting.

Your score shows a very low score on the 'D' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You prefer to withhold your decision until you have enough information.
- You can be considered "quiet" in team settings or when in the midst of heated debates.
- You like specialized assignments or work.
- You like to take a more mild-mannered and measured hand in dealing with others.
- You like working in a stable, predictable environment with steady work flow.
- You can depend heavily on others to help make decisions.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Interactive

Your approach to interacting with people and display of emotions

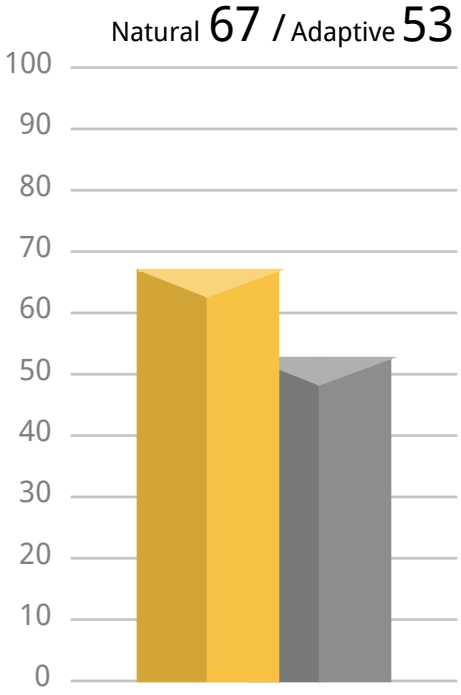

The I in DISC represents Interactive. Your score on this scale represented below shows your location on the I spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher I —

Tend to meet new people in an outgoing, gregarious, and socially assertive manner. The key here is new people whom one hasn't met before. Many other styles are talkative, but more so with people that they've known for some time. The Higher I scores are talkative, interactive and open even with people whom they have just initially met. People scoring in this range may also be a bit impulsive. Generally speaking, those with the Higher I scores are generally talkative and outgoing.

Lower I —

Tend to meet new people in a more controlled, quiet and reserved manner. Here's where the key word "new people" enters the equation. Those with Lower I scores are talkative with their friends and close associates, but tend to be more reserved with people they've just recently met. They tend to place a premium on the control of emotions, and approach new relationships with a more reflective approach than an emotional one.

Your score shows a moderately high score on the 'I' spectrum. The comments below highlight some of the traits specific to just your unique score.

- Sometimes you can express your opinion too much.
- You can be pretty disorganized and lack great attention to detail.
- You are sociable and outgoing with others.
- You tend to be always ready to converse with a group, even with people you've just met.
- You tend to naturally trust others and their ideas.
- You strongly prefer a democratic and not dictatorial professional environment or relationships.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Stabilizing

Your approach to the pace of the work environment

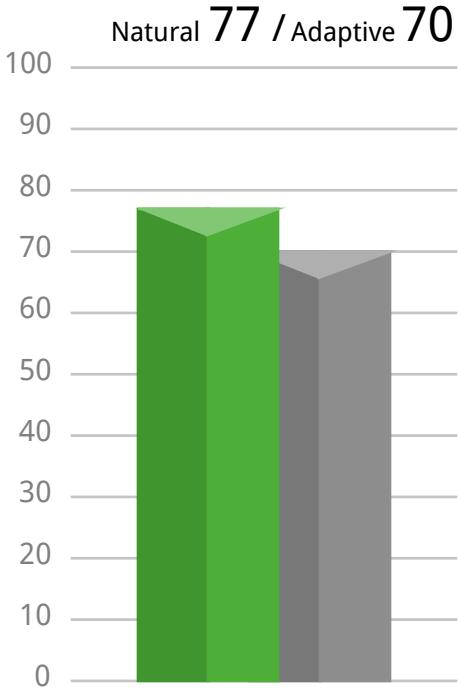

The S in DISC represents Stabilizing. Your score on this scale represented below shows your location on the S spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher S —

Tend to prefer a more controlled, deliberative and predictable environment. They place a premium on security of a work situation and disciplined behavior. They also tend to show a sense of loyalty to a team or organization, and as a result, may have a greater longevity or tenure in a position than some other styles. They have an excellent listening style and are very patient coaches and teachers for others on the team.

Lower S —

Tend to prefer a more flexible, dynamic, unstructured work environment. They value freedom of expression and the ability to change quickly from one activity to another. They tend to become bored with the same routine that brings security to the Higher S traits. As a result, they will seek opportunities and outlets for their high sense of urgency and high activity levels, as they have a preference for spontaneity.

Your score shows a moderately high score on the 'S' spectrum. The comments below highlight some of the traits specific to just your unique score.

- You're a very good team player.
- You bring a high sense of loyalty to the rules and regulations that govern projects, people, and processes.
- You strongly prefer a workplace with a sincere, personal, and agreeable environment with little hostility.
- You are very patient.
- Increasing your sense of urgency could benefit your performance in many instances.
- You can be fairly resistant to change.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Cautious

Your approach to standards, procedures, and expectations

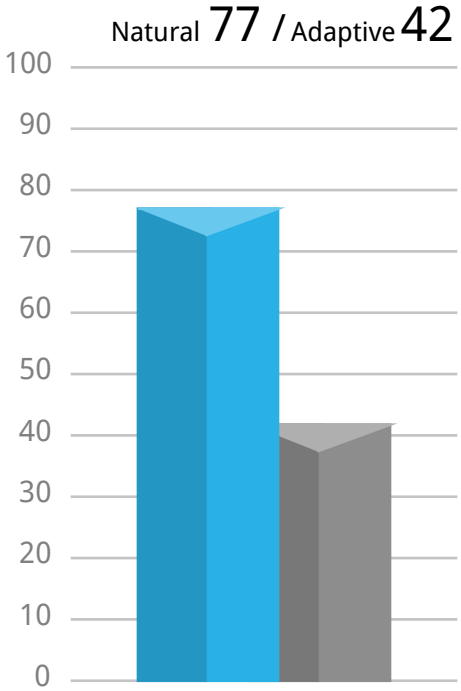

The C in DISC represents Cautiousness. Your score on the scale represented below shows your location on the C spectrum based on the pattern of your responses. A high score doesn't mean good, and a low score doesn't mean bad, as this is a spectrum or continuum of behavioral traits. For example:

Higher C —

Tend to adhere to rules, standards, procedures, and protocol set by those in authority whom they respect. They like things to be done the right way according to the operating manual. "Rules are made to be followed" is an appropriate motto for those with higher C scores. They have some of the highest quality control interests of any of the styles and frequently wish others would do the same.

Lower C —

Tend to operate more independently from the rules and standard operating procedures. They tend to be bottom-line oriented. If they find an easier way to do something, they'll do it by developing a variety of strategies as situations demand. To the Lower C scores, rules are only guidelines, and may be bent or broken as necessary to obtain results.

Your score shows a moderately high score on the 'C' spectrum. The comments below highlight some of the traits specific to just your unique score.

- When you disagree, you may express your resistance in a passive-aggressive manner.
- You may be perceived as somewhat resistant to change.
- You like to use a lot of detail when explaining processes and tasks to others.
- You are excellent at gathering detailed information and examples.
- You are very conscientious in delivering high levels of detail.
- You think it is important to adhere to specific and detailed instructions or procedures.

Natural Style Pattern:

Your natural style is the way you tend to behave when you aren't thinking about it. This is where you are most comfortable (natural). This is also the style you will revert back to when under stress or moving too quickly to be consciously thinking about modifying your behavior. Finally, this is the style you should seek to be true to in your daily roles. Being natural will return better results with less effort and stress. The following statements are true to just your unique natural style:

- You persuade others by demonstrating personal competence and encouraging others with a sense of optimism.
- You have a large knowledge-base and a continuing appetite to learn more.
- You score like those who desire to become the best they can, or an expert, in a specific area.
- May become verbally disappointed when standards aren't met, or when the team project becomes delayed.
- You tend to be verbal and articulate about many different topics and issues.
- Tend to be more modest than egocentric, but you also have the ability to become assertive when necessary for emphasis or communication.
- Response pattern indicates that you have the ability to be a strong achiever in technical performance and expertise within the organization.
- You have the ability to handle people with patience, and demonstrate high technical competence in your area of expertise.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Adaptive Style Pattern:

This is the style of behavior you adapt to when you are conscious of your own behavior, when you feel you are being observed or whenever you are trying to better fit a situation. This is not a natural style for you, but still one of your two styles none-the-less. In other words, it is the way you feel you "should" behave when thinking about it. The statements below are specific to your individual Adaptive style:

- Motivated to be a team player and supportive of team efforts.
- Scores like those who are empathic individuals who show a high 'sincerity-factor' in the things they do and say.
- Ready, willing, and able to help others become more effective and successful.
- Wants to be seen as one who shows sincere interest in both internal and external stakeholders on a project.
- Motivated to demonstrate good organizational skills in building complex processes, and following through to completion while maintaining a positive climate.
- Excellent listening style. Known by others as an active and interested listener.
- Persuades others by offering empathy, understanding, and friendship.
- An ability to get along with a wide variety of other people.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on your behavioral style there are certain opportunities for becoming more effective by being aware of how you prefer, and enjoy, to behave. The items below may assist you in your professional development growth. By understanding these items you may find explanations for why you may be stuck in some areas of your life and why other aspects give you no trouble at all. You could be more effective by:

- A greater emphasis on tasks, organizational work, business, or profits.
- Learning to say "no" more often to requests from others, to prevent spreading yourself too thin.
- Associating with friendly, active people.
- Becoming more comfortable with faster decision-making.
- Having an efficient system in place to handle routine work more effectively.
- An increased sense of urgency to get things done... now.
- Job description presented clearly and with no ambiguities.
- Complete explanations of the nature of a process or systems used.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style will cause you to be motivated by certain factors in your environment. Having these present may make you feel more motivated, and productive. The following are things that you may want in your surroundings to feel optimally motivated:

- Sincerity from peers and colleagues.
- Assignments that allow for a variety of people-contact.
- Wants to work with a team of people that show a high trust level.
- Public recognition of accomplishments and meeting of goals.
- A strong, visible group or organization with which to identify.
- A variety of activities involving people, both on the job and off.
- Identification with company and colleagues that one can be proud of.
- An environment with minimal interpersonal conflict and hostility.

Vincent Jones Roxas

Each behavioral style contains certain unique strengths as a result of how your four behavioral dimensions relate to each other. Understanding your own unique behavioral strengths is an important part of putting your new level of self-awareness to work for your success and satisfaction. The following statements highlight specific strengths of your behavioral style:

- Self-motivated, and goal-directed, and able to spread that motivation to others.
- Able to get along with a variety of other styles.
- Precise in the things you offer to a complex process or solution.
- Builds confidence in others needing a boost.
- Technically skilled and proficient in your area of specialty.
- A keen awareness of the broad-based impact of important decisions.
- Solves problems with people in mind.
- Very proficient in your area of expertise.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Your behavioral style plays a significant role in determining what aspects of an environment you like. The items below will help you understand what will define an ideal working climate for you. Based on how you prefer to behave, an ideal climate for you is one that provides you with:

- An environment where you can work with people with whom you have developed trust, rapport, and credibility.
- Activities with many opportunities for interaction with people.
- Appreciation for your long hours and work ethic on tough projects and assignments.
- Environment where you can interact with people in a comfortable, non-hectic manner.
- A secure work situation, in exchange for the loyalty and work-ethic demonstrated.
- Clear areas of responsibility with minimal ambiguities.
- Building a network of people and contacts with groups.
- A democratic supervisor and work environment.

Vincent Jones Roxas

Along with strengths, all behavioral styles come with areas that could become weaknesses - if depended upon or not acknowledged. The trick is not to manufacture a weakness in the first place by depending on these things.

Here are a few items that could become problematic for you if not acknowledged or known. Your awareness of the potentials below is your best step in making sure they remain only potential problems. Due to your behavioral style, you may tend to:

- Hang on too much to current or past procedures, especially when faced with impending change.
- Oversell your own ideas too strongly.
- Struggle with meeting deadlines due to your desire for completeness or perfection.
- Require an overly complete explanation of details before changes are made.
- Overestimate the ability of others.
- May provide a false sense of buy-in to others on the team, then resist passive-aggressively.
- Get overly bogged down in details, especially when the climate becomes pressured.
- Be overly optimistic in ability to persuade or manage others.

Copyright 2026 Innermetrix Incorporated • All rights reserved

Based on how you tend to behave you have certain preferences for how you like to convey information, teach, instruct or share knowledge with others. This is also true of how you like to receive information and learn. Understanding your behavioral preferences here will help increase your effectiveness in teaching or instructing others, and in being taught and learning.

How you prefer to share knowledge or teach:

- Wants to know performance outcomes, objectives, etc., and communicates these to the participants.
- Shows patience with tedious, technical, and specialty tasks and helping others to learn.
- Helps group create new concepts and models of ideas.
- Appreciates intellectual recognition.
- Prefers explicit instructions and measurement criteria to be established with the participants.
- Shows authority by demonstrating trust and participation with the group.
- Presents detailed information in a logical and sequential manner.

How you prefer to receive knowledge or learn:

- Likes controlled variety in the learning environment.
- Shows patience with tedious, technical, and specialty tasks.
- More accepting of a more impersonal training or learning venue than others.
- Seeks inspiration and excitement in the learning process.
- Looks for meaning and clear integration of the learning activities.
- Emphasizes cognitive activity and theoretical perspectives.
- Prefers traditional learning structure and activities.

Copyright 2026 Innermetrix Incorporated • All rights reserved

This page is unique in this report because it is the only one that doesn't speak directly to you, rather to those who interact with you. The information below will help others communicate with you more effectively by appealing to your natural behavioral style. The first items are things others SHOULD do to be better understood by you (Do's) and the second list is of things others SHOULD NOT do (Don'ts) if they want you to understand them well.

Things to do to effectively communicate with you:

- Do your homework, because others will have already done their share of it.
- Offer input on how to make the ideas become reality.
- Provide logical and practical evidence.
- Make an organized appeal for support and contributions.
- Be certain to remember to provide specific action steps and details for all involved.
- If you disagree with the direction, make an organized presentation of your position.
- If you agree with the outcome, follow through and do what you say you will do.

Things to avoid to effectively communicate with you:

- Avoid being impersonal or judgmental.
- If you disagree, don't let it reflect on others personally, and don't let it affect the relationship.
- Don't rush the issues or the decision-making process.
- Don't legislate.
- Don't manipulate or bully others into agreeing.
- Don't be vague about what's expected.
- Don't use someone else's opinions as evidence.

In order to make the most out of the information in this report it is important that you connect it to your life in a tangible way. To help you make this information your own, and pull out the most relevant parts, fill in the blanks below.

Decisiveness:

How is your 'D' score relevant to your life?

_____

Interacting:

How is your 'I' score relevant to your life?

_____

Stabilizing:

How is your 'S' score relevant to your life?

_____

Cautiousness:

How is your 'C' score relevant to your life?

_____

Overall Natural Style:

What is one way in which your natural style relates to your life?

_____

Overall Adaptive Style:

What is one way in which your adaptive style relates to your life?

_____

Strength-based insights:

What specific strengths do you think connect to your success more than any other?

_____

Copyright 2026 Innermetrix Incorporated • All rights reserved

Communication Dos and Don'ts:

What did you learn from understanding your preferred communication style?

_____

Ideal Job Climate:

How well does your current climate fit your behavioral style?

_____

Effectiveness:

What is one way in which you could become more effective?

_____

Motivation:

How can you stay more motivated?

_____

Improvement:

What is something you learned that you can use to improve your performance?

_____

Training/Learning:

What did you learn that could help you instruct others better, or learn more effectively?

_____
